Basic Series

Delivery: **Easy** **Standard**

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel

Other versions available:

- Double floor fixation
- Base and spindle made in polyamide and zinc plated insert.

The **BASIC series**, with plastic baseplate and fully threaded spindle is the standard choice for the industrial environments.

The spindle can be made with flat or hexagonal key wrench and is available in two different materials, zinc plated steel or stainless steel.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 500 N.

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel

Other versions available:

- Anti-slip NBR rubber pad
- Double floor fixation
- With PA ball

The **ARTICULATED series**, with plastic baseplate and fully threaded spindle is the standard choice for the industrial environments.

The spindle is made with hexagonal key wrench and available in two different materials, zinc plated steel or stainless steel and the baseplate is available with or without rubber pad.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 500 N.

P400R Series

RANGE EXTENSION

Delivery: **Easy** **Standard**

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel
- Washer in austenitic stainless steel

Versions available:

- Anti-slip NBR rubber pad
- Double floor fixation

The **P400R series**, with plastic baseplate, fully threaded spindle and stainless steel washer is the best choice for industrial environments where a medium-high level of hygiene is required.

The compact baseplate and the smooth edges guarantee an excellent cleanability, even in critical conditions and the stainless steel washer ensures complete closure between the spindle and the baseplate.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 500 N.

STEEL Series

Delivery: **Easy** **Standard**

Main features:

- Stamped baseplate in austenitic stainless steel or zinc plated steel
- Spindle in austenitic stainless steel or zinc plated steel

The **STEEL series**, with stamped baseplate and fully threaded spindle is the standard choice for the industrial environments, where a low level of hygiene and low load are required.

Ideal for heavy and dirty production environments, the STEEL series can be provided without fixing holes, with 2 fixing holes or with 4 fixing holes.

The spindle is made with hexagonal key wrench and is available in two different materials, zinc plated steel or stainless steel.

Maximum compressive strength (static load) 10.000 N, maximum tensile strength (static load) 4.000 N.

S400 Series STAINLESS STEEL LEVELERS WITH FULLY THREADED SPINDLE

RANGE EXTENSION

S400

Main features:

- Overmolded baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Washer in austenitic stainless steel
- Vulcanized anti-slip NBR rubber

Versions available:

- Single floor fixation

S400 SPLIT

Main features:

- Overmolded baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Separate spindle and baseplate
- Vulcanized anti-slip NBR rubber

S400 HEAVY

Main features:

- Full machined baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Washer in austenitic stainless steel

Versions available:

- Vulcanized anti-slip NBR rubber
- Double floor fixation

S400 HEAVY-SPLIT

Main features:

- Full machined baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Separate spindle and baseplate

Versions available:

- Vulcanized anti-slip NBR rubber

The **S400 series**, with overmolded base plate in austenitic stainless steel, fully threaded spindle and stainless steel washer is the best choice for industrial environments where a high level of hygiene is required.

The stainless steel baseplate and its particular shape guarantees an excellent cleanability, even in critical conditions; the stainless steel washer ensures complete closure between the spindle and the baseplate and the NBR rubber guarantees anti-slip properties and hermetic closure between the leveller and the floor.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 4.000 N (S400); 8.000 N (S400 HEAVY); NOT AVAILABLE (SPLIT and HEAVY-SPLIT).

Core product range of Easy Clean
Levelling Feet can be found **here**.

S400 Series

Piedi di livellamento / Leveling feet / Nivellierfüße

S400B Series

 HYGIENIC STAINLESS STEEL LEVELERS**RANGE EXTENSION**Delivery: **Easy** **Standard**

S400B

Main features:

- Overmolded baseplate in AISI 304
- Spindle and cover in AISI 304
- Washer in AISI 304
- Vulcanized anti-slip NBR rubber

Versions available:

- with single floor fixation

S400B SPLIT

Main features:

- Overmolded baseplate in AISI 304
- Spindle and cover in AISI 304
- Separate spindle and baseplate
- Vulcanized anti-slip NBR rubber

S400B HEAVY

Main features:

- Full machined baseplate in AISI 304
- Spindle and cover in AISI 304
- Washer in AISI 304 stainless steel

Versions available:

- Vulcanized anti-slip NBR rubber
- Double floor fixation

S400B HEAVY-SPLIT

Main features:

- Full machined baseplate in AISI 304
- Spindle and cover in AISI 304
- Separate spindle and baseplate

Versions available:

- Vulcanized anti-slip NBR rubber

The **S400B series**, with overmolded baseplate in AISI 304 stainless steel, threaded spindle with complete closure cover and stainless steel washer is the best choice for industrial environments where a high level of hygiene is required, like food, chemical and pharmaceutical industries.

The stainless steel baseplate and its particular shape guarantee an excellent cleanability, especially in critical conditions; the stainless steel cover avoids exposure of the thread part to external agents; the stainless steel washer ensures complete closure between the spindle and the baseplate and the NBR rubber guarantees anti-slip properties and hermetic closure between the leveler and the floor.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 4.000 N (S400); 8.000 N (S400 HEAVY); NOT AVAILABLE (SLIT and HEAVY-DUTY).

NEW

C500 Series

HYGIENIC AND CERTIFIED
STAINLESS STEEL LEVELERS

The **C500 series** is the best choice for industrial environments with critical hygienic level, like dairy, food, chemical and pharmaceutical industries, subjected to daily washing cycles.

It offers a complete protection against bacterial proliferation and guarantees reduced washing cycle time as well as self-draining surfaces able to drain external elements easier than traditional systems.

The new **C500 series** with hygienic stainless steel follows actual regulations and is approved by 3A and EHEDG normative. Base, spindle and cover are produced exclusively in AISI 304, with surface finishing lower than 0,8 µm, silicon blue seals are FDA approved and easily detectable by industrial scanner.

HYGIENIC DESIGN

Completely sanitized and certified

SAVING (Energy, water, detergents)

Fewer resources for sanitation

SUPERIOR DURABILITY

Thanks to the threaded part's cover

CLEANLINESS

Reduced washing cycle

AVAILABLE RANGE

The **C500 series** is available as following versions:

C500 Series

For standard applications, hygienic and certified.

C500 Series SPLIT

For application with higher floor slope or where separate base and spindle is required.

C500 Series HEAVY

For high load applications.

C500 Series HEAVY-SPLIT

For high load applications where the separate base and spindle is required.

Every above version offers excellent hygienic performances.

CERTIFICATIONS

The **C500 series** has 3A and EHEDG certifications, provided based on the selected type.

These certifications are released by no profit associations that protect consumers, guaranteeing products made according to the internal standards. This applies to all processes and components in contact directly or indirectly with every single food. Movex is committed to offer a high quality product in according to the most recent normative.

- Non-profit European consortium
- Regulations for food manufacturers, machine food manufactures and food raw material suppliers
- Research institutes and universities
 - Government health agencies
 - Approximately 45 guidelines

- Non-profit American association
- Regulations for food manufacturers, machine food manufactures and food raw material suppliers
 - Public and governmental health agencies
 - Over 70 guidelines

WHY CHOOSE A CERTIFIED PRODUCT?

Calculated saving

The stainless steel self-draining surfaces help the entire washing process, reducing time and resources consumption.

UV ray analysis

The real difference between a conventional leveler and the hygienic and certified **C500 series** is invisible with human eyes.

If we compare two levelers that have been subjected to the same washing process, they will both look clean and sanitized; but analyzed with UV ray, we will see that the conventional solution is still contaminated by bacteria (see picture).

C500 Series

DECLARATION OF CONFORMITY

C500, C500-HEAVY, C500-SPLIT, C500-HEAVY-SPLIT series are certified 3A and EHEDG, following product details.

FEATURES

Base, spindle and cover material:

- Stainless steel AISI 304 (1.4301) – available also in AISI 316 (1.4401) on request

Anti-slip rubber:

- NBR rubber, color black
- Hardness: 70-75 Shore-A
- Working temperature: -30°C÷110°C
- Compliant to REACH (CE 1907-2006)
- Compliant to ROHS&ROHS 2 (2002/95/EC)

Seals:

- Silicone rubber, color blue
- Hardness: 60 Shore-A
- Working temperature: -60°C÷200°C
- Compliant to FDA normative

Ref. Norms.

The **C500 series** and all its versions (**HEAVY**, **SPLIT** and **HEAVY-SPLIT**) are the ideal choice for all those environments where hygienic level is constantly monitored (dairy, food, chemical and pharmaceutical industries) subjected to daily washing cycles.

Self-draining surfaces with roughness lower than 0,8 µm and the 3 seals (blue silicone detectable with food scanner) placed respectively inside the cover and between the spindle and the baseplate guarantee a hermetic closure, avoiding any external parts infiltration.

Following **3A** normative, levelers are properly installed when they provide a minimum clearance between the lowest part of the equipment and the floor of not less than 4.0 in. (102 mm) when the equipment base outlines an area in which no point is more than 12.5 in. (318 mm) from the nearest edge of the base, or a clearance of at least 6 in. (152 mm) when any point is more than 12.5 in. (318 mm) from the nearest edge.

Following **EHEDG** normative, recommended distance between floor and machined is at least 300 mm. Levelers with fixation need to be installed always with Movex certified nuts, on the contrary the company will not guarantee certifications requirements (follow installation manual – floor fixation, provided with every delivery).

Movex supplies all certified levelers with seals (unlosable); nevertheless, the end user should always check correct seals position before proceeding with the installation (follow installation manual, provided with every delivery).

C500 levelers have great resistance to the most common industrial detergents, following material specifications, compatible with producer specifications.

For a correct execution, please always follow provided manual (maintenance and cleaning manual, included in every delivery).

NEW C500 Series

HYGIENIC AND CERTIFIED STAINLESS STEEL LEVELERS

Delivery: **Easy** **Standard**

C500

Main features:

- Overmolded self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber

Other versions available:

- Single floor fixation

C500 SPLIT

Main features:

- Overmolded self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber
- Separate spindle and baseplate

C500 HEAVY

Main features:

- Full machined self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber

Other versions available:

- Double floor fixation

C500 HEAVY-SPLIT

Main features:

- Full machined self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber
- Separate spindle and baseplate

The **C500 series**, with baseplate in AISI 304 stainless steel, threaded spindle with cover and hermetic seals is the best choice for industrial environments with critical hygienic level, like dairy, food, chemical and pharmaceutical industries, subjected to daily washing cycles.

The stainless steel baseplate and its particular shape guarantee an excellent cleanability, especially in critical conditions; the stainless steel cover offers 100% thread protection and avoids its exposure to external agents; the three seals (blue silicone detectable with food scanner) placed respectively inside the cover and between the spindle and the baseplate guarantee a hermetic closure, avoiding any external parts infiltration and the NBR rubber guarantees anti-slip proprieties and hermetic closure between the leveler and the floor.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 4.000 N (S400); 8.000 N (S400 HEAVY); NOT AVAILABLE (SPLIT and HEAVY-SPLIT).

The **C500 series** can also be combined with hygienic bolts, nuts and covers for perfect sanitation.
