The innovative design of **Movex® Zero Contact™ PRO** is recommended for high speed, heavy loads and transportation of abrasive substances, like sand, salt, sugar, and many other applications.

The stainless steel pins guarantee a higher working load and due to the new pin retention with grub screw, the assembly of this belt is 100% secure.

The robust structure of **Zero Contact™ PRO** can be summarized in minimal maintenance, long life expectation and high reliability.

Zero Contact™ PRO is a versatile belt, allowing a wider range of available widths and radii. Find out also our “two-tracks” version.

CURVE CONVEYOR

TWO TRACKS VERSION

Product use

Zero Contact™ PRO is available also with “two-tracks” design; by keeping the same advantages of the Zero Contact™ PRO, with the Zero Contact™ PRO “two tracks” the maximum working load can be even higher thanks to the increased number of bearings. Moreover, the two belts can work at different / independent speeds and can be activated independently thanks to the double shaft.

The two belts can also be used for goods acceleration or can be also stopped independently, in case there is a double track infeed conveyor.

Separate belts offers the possibility of different / higher speeds

2 different bearing-tracks guarantee extreme load, even at higher speed

Straight exit

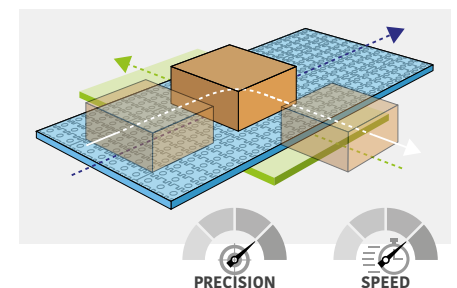

To get a completely straight exit, the **directional belt must be activated when 553 FlexTop is not running.**

Inclined exit

To get a 45° inclined direction, the **speed of the directional belt must be the same** as the speed of the 553 FlexTop and they have to work contemporary.

Curved exit

To get a straight exit without losing relatively too much time, the **directional belt can be activated also when the 553 FlexTop is running, while is reducing speed.**

The combination of the two speeds will determine the exit curve dimension.

553 Sorter⁺

Dynamic turn

Equipped with two directional belts underneath the 553 FlexTop belt running at opposite direction, the Sorter plus - dynamic turn will let your products start rotating.

This configuration is ideal to turn products in high-speed production lines that can be handled without stopping the 553 FlexTop belt.

The distance of the rotation depends by the combination of the 3 different speeds.

These codes mean complete stainless steel conveyor, except floor supports and gearmotor, if you need to include them please see page 71.

BORN TO PERFORM

BluLub® is the Movex super-performance compounded Ultra High Molecular Weight Polyethylene material, with the latest generation of solid lubricants, able to contribute improving PV properties (limiting pressure velocity) compared to standard UHMW-PE, especially in applications with limited lubrication, higher speeds and/or higher loads.

BluLub® ensures high wear and abrasion resistance, requires less energy and with the lowest coefficient of friction, improves the product stability and wear life of sliding parts.

Low Friction

Lowest coefficient of friction compared to traditional materials.

High Performance

Extreme material performances with high speeds and loads.

Molecular density:
9,200,000 g/mol.

Operating temperature:
-40 to + 80°C (-40 to 176°F)

Linear expansion coefficient:
 $2 \times 10^{-4} \text{C}^{-1}$ ($1.1 \times 10^{-4} \text{F}^{-1}$)

FDA
APPROVED

Thanks to the unique **BluLub®** characteristics, all the extruded profiles can offer several advantages like longer wear life, minimized dust generation and extreme noise reduction. The recent test with the Technical University of Chemnitz, confirmed **BluLub®** being the best material available for dry running applications.

UP TO **80%**
ENERGY SAVING

With lowest coefficient of friction and optimized sliding properties of **BluLub®**, the conveying power required, thus the energy consumption, can be extremely reduced.

Titanium (WHITE)

High quality, BRIGHT WHITE extrusion.

The name **Titanium White®** refers to the special metal because it has comparable unique properties, like high strength and optimum performance, generating low friction, absorbing heat and reducing energy consumption.

Thanks to the **Titanium White®** characteristics, the extruded profiles are made of an intense white UHMW-PE, resulting in a smoother surface and devoid of push marks, meaning in a minimized power consumption and possible goods defect. It has also an improved UV and aging resistance and a high chemical resistance.

UHMW-PE

Standard profiles are all made with a first-rate **UHMW-PE** polyethylene, a thermoplastic polymer with a variable crystalline structure with a vast range of applications.

UHMW-PE is available in several colors and lengths. It's the perfect choice to reach your line performance against an attractive price.

-  Molecular density: **5,600,000 g/mol.**
-  Operating temperature: **-40 to + 80°C (-40 to 176°F)**
-  Linear expansion coefficient: **$2 \times 10^{-4} \text{°C}^{-1}$ ($1.1 \times 10^{-4} \text{°F}^{-1}$)**

AS Antistatic

Plastic packaging and PET bottles can generate high levels of static buildup.

Static dissipative profiles are plastics designed to reduce static electricity in order to protect electrostatic-sensitive devices or contain flammable liquids or gases.

-  Molecular density: **5,600,000 g/mol.**
-  Operating temperature: **-40 to + 80°C (-40 to 176°F)**

HIGH QUALITY SIDE GUIDES

Made with ram extrusion technology and new patented process.

The Movex side guides, extruded with RAM extrusion technology, are the perfect choice to improve the conveyor performances. Thanks to a new patented and innovative production process, we have further enhanced our range of profiles, improving performance and reducing the dust creation.

These profiles are available with height from 50 to 170 mm, and with many different shapes and types (with clamping system or label saver), and can also be extruded with our unique materials **BluLub®** and **Titanium White®**, providing unparalleled performance and reliability.

KEY BENEFITS

compared to traditional extrusion technique:

- Best efficiency • Increased wall thickness
- Superior flatness • Improved sliding properties
- Reduced product damage • Smoother shape
- Less dust/powder • Improved superficial texture
- High-level quality standards

RS SIDE GUIDE RAIL

Easy and modular replacement label saver system.

RS Side guide profile is a development which enable you to simplify your business! Thanks to the replaceable wear-strip in **BluLub®**, **RS Side guide profile** can reduce total cost of ownership: in case of required maintenance, only **BluLub®** strips can be replaced, saving time at a lower cost.

Different profiles are available from stock and can be mounted in different ways to optimize the support of your product according to the specific needs.

Increased performance

BluLub® wearstrips contribute to a lower friction which results in less energy consumption.

Fast and easy maintenance

Thanks to its innovative design, the easy replaceable **BluLub® wearstrips** meets the needs to reduce maintenance time.

Interchangeable wearstrip

Every **BluLub® wearstrip** has the same fixing system, this makes all versions interchangeable. In case of required replacement, wearstrips can be ordered as coiled spare parts.

No gap between connection

BluLub® wearstrip allows you to connect two or more different base profiles with no gap, by simply slide it in.

The right choice for:

- Innovative equipment
- Total cost reduction
- Less energy consumption
- Improved product stability

RS Side guide rail profiles are available in various executions.

Materials:

- Base profile: **UHMW-PE** (see details).
- Label saver: **BluLub®** polyethylene UHMW-PE with molecular density 9,200,000 g/mo. with reduced coefficient of friction and higher wear resistance and its complies with the code of Federal Regulations of FDA (see details).

Movex[®] PROFILE TEST

Technische universität CHEMNITZ.

TECHNISCHE UNIVERSITÄT
CHEMNITZ

The following graphics show the test results obtained with a cooperation with the Technical University of Chemnitz, which analysed the coefficient of friction and the wear values of the Movex profiles (BluLub, Ti-White and UHMPWPE) in combination with our main plastic chain materials (LF and PFX) and cans and PET bottles.

A dedicated setup shown in the following pictures have been studied, in order to represent the reality as much as possible (it must be considered that, being a test environment, many factors could not be considered, e.g. temperature, dirt, cycling operations).

In general, it can be seen that the friction values are below 0.15 in all tests for BluLub and Titanium White, i.e., the pairings consistently exhibit very good sliding behaviour. For UHMW-PE and HDPE the values show clearly different performances.

The LF chain produced the expected results with the drop in friction values from dry running to water lubrication to lubricant. It is noticeable that significantly lower friction values were measured with water and lubricant compared to PFX chain. With the PFX chain, the phenomenon also occurs that the friction values with water lubrication are noticeably higher than those with dry running.

For dry conditions, BluLub and PFX combination offers the best performances, even if the combination of Titanium White and LF is not that far away; the main differences between the two combinations is shown in the wear graphs.

Another clear difference (which is not analysed in this report, as was not the scope of it) is the carried product stability; in fact, the coefficient of frictions of PFX and LF are very different (more information on the Movex general catalog).

In water condition it is evident that LF in combination with Ti-White offers the best performance. For the complete report, please ask to your sales representative.

C500 Series

DECLARATION OF CONFORMITY

C500, C500-HEAVY, C500-SPLIT, C500-HEAVY-SPLIT series are certified 3A and EHEDG, following product details.

FEATURES

Base, spindle and cover material:

- Stainless steel AISI 304 (1.4301) – available also in AISI 316 (1.4401) on request

Anti-slip rubber:

- NBR rubber, color black
- Hardness: 70-75 Shore-A
- Working temperature: $-30^{\circ}\text{C} \div 110^{\circ}\text{C}$
- Compliant to REACH (CE 1907-2006)
- Compliant to ROHS&ROHS 2 (2002/95/EC)

Seals:

- Silicone rubber, color blue
- Hardness: 60 Shore-A
- Working temperature: $-60^{\circ}\text{C} \div 200^{\circ}\text{C}$
- Compliant to FDA normative

Ref. Norms.

The **C500 series** and all its versions (**HEAVY, SPLIT** and **HEAVY-SPLIT**) are the ideal choice for all those environments where hygienic level is constantly monitored (dairy, food, chemical and pharmaceutical industries) subjected to daily washing cycles.

Self-draining surfaces with roughness lower than $0,8 \mu\text{m}$ and the 3 seals (blue silicone detectable with food scanner) placed respectively inside the cover and between the spindle and the baseplate guarantee a hermetic closure, avoiding any external parts infiltration.

Following **3A** normative, levelers are properly installed when they provide a minimum clearance between the lowest part of the equipment and the floor of not less than 4.0 in. (102 mm) when the equipment base outlines an area in which no point is more than 12.5 in. (318 mm) from the nearest edge of the base, or a clearance of at least 6 in. (152 mm) when any point is more than 12.5 in. (318 mm) from the nearest edge.

Following **EHEDG** normative, recommended distance between floor and machined is at least 300 mm. Levelers with fixation need to be installed always with Movex certified nuts, on the contrary the company will not guarantee certifications requirements (follow installation manual – floor fixation, provided with every delivery).

Movex supplies all certified levelers with seals (unlosable); nevertheless, the end user should always check correct seals position before proceeding with the installation (follow installation manual, provided with every delivery).

C500 levelers have great resistance to the most common industrial detergents, following material specifications, compatible with producer specifications.

For a correct execution, please always follow provided manual (maintenance and cleaning manual, included in every delivery).
