Oadby Conveyors

Movex®
OFFICIAL UK PARTNER

Made in **ITALY**
PERFORMING everywhere.

Company Headquarters
Castelli calepio (BG) - ITALY

Movex® is a dynamic company driven by the ambition to design and manufacture conveying and material handling technology of the highest quality. We combine superior technical performance and design to provide customers with innovative solutions and impeccable service.

At our Italian headquarters, we design and manufacture standard and customized products and solutions to meet customers' needs in a dynamic and proactive environment.

Movex® follows every single customer from the project to installation, guaranteeing full support. With more than 30 technical sales representatives worldwide, we offer global support directly on-site, via video conference or by phone. Thanks to worldwide warehousing, we are able to provide short lead times and, in the event of the need for faster delivery times, our Priority Service, offering delivery in 1/2 working days, is always available.

As a leader in beverage and logistics conveyor components, Movex® stands as a robust entity in the industry with over 14 years of dynamic presence, ensuring quality products and impeccable service.

MISSION

To forge our values through the development of ideas and high standards, and to professionally support our partners with flexibility and efficiency.

VISION

To achieving strong market leadership, while constantly remaining up to date. To plan our future while remaining faithful to our history and values.

Movex's New Website

Always up to date with our latest news and products!

Discover **Movex®** at the click of a button: visit our new website to learn about all our solutions, browse the digital catalog to find the perfect products for your needs, and don't forget to follow us on social media to stay updated on the latest news and events!

Movex® offers you innovation and quality at your fingertips, wherever you are.

PFX

The best choice for dry running applications.

PFX is the plastic material specifically developed for chains and belts in order to run with limited lubrication or in dry applications where the demands are extreme concerning speed, performance & efficiency.

Contact us, and request a free quotation!

820 FT

828 FT

880 M

880 TAB

Other different types of product in PFX are on request.

Low friction

Developed to reduce friction between chain and product, and chain and wearstrip.

Minimal dusting

Developed to avoid dusting under extreme circumstances.

Food contact Certified

PFX material is suitable in food application.

High performance

Longer wear life lead to excellent and long enduring product handling features.

Control of cost

Better control of total cost & sustainable conveyor technology.

Patented material

PFX is an exclusive product of Movex.

Energy saving | Low friction | High efficiency | High visibility

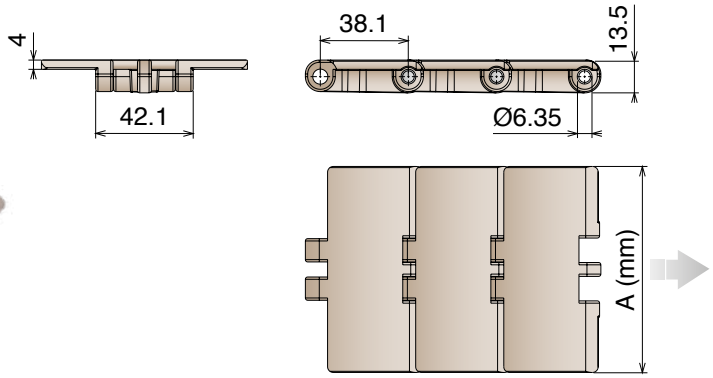

FDA APPROVAL

820 Series
PRODUCT UPDATE

Movex created an optimized version in which the gap between the links is 45% lower and the contact surface has increased up to a maximum of 15%: the result is an improved product stability. The new design is completely interchangeable and connectable with the previous one.

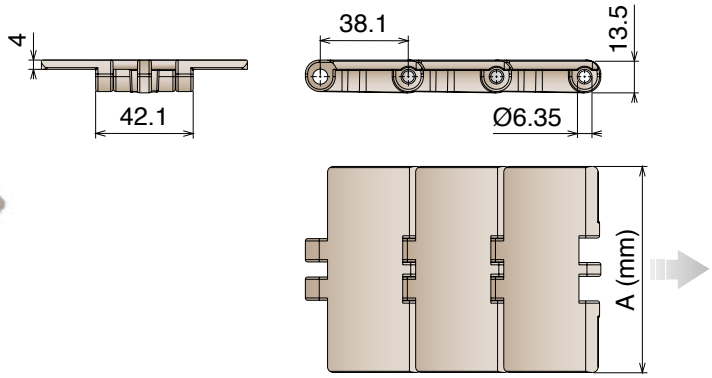

Advantages:
- Improved stability
- Minimized open gap
- Increased sliding surface
- Same backflex radius

Movex

67

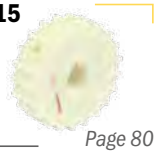

What is the S dimension?

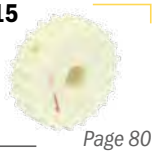

It defines the distance between sprocket/idler (=shaft) center and top of wear strip.
It ensures smooth run of the chain at minimum noise level.

The value is specified for each type and size of sprocket in the tables on the following pages of the chapter.

For bore tolerance refers to Movex engineering manual available on our website.

Turning disks

The use of drive disks, idler disks and turnings disks enables the design of the conveyor to be realized with many curves, greatly reducing the PV and guaranteeing exceeding performances compared to traditional system.

Thanks to our machined versions, superior tolerances and planarity are provided; it will then become easier to realize longer conveyors either at the same level or staggered, inclined or declined.

109

What is the S dimension?

It defines the distance between sprocket/idler (=shaft) center and top of wear strip.
It ensures smooth run of the chain at minimum noise level.

The value is specified for each type and size of sprocket in the tables on the following pages of the chapter.

For bore tolerance refers to Movex engineering manual available on our website.

Movex® MACHINING CENTER

We machine for your business.

The machining department is where we produce straight sections and corner tracks (TAB, Magnetic & bevel versions) available in a range of unique and patented materials in various shapes and an extensive selection of polyamide sprockets, idler wheels and turning disks, either machined or molded and suitable for covering all applications.

Movex® uses only top-materials and the best CNC technology for all types of processes required; this allows us to offer unrivaled accuracy and products that meet the needs of the most demanding clients. Beside the standard available corner tracks, we have organized a specific workflow to create tailor made products, developed over the last ten years, which aims to satisfy the requirements of even the most demanding buyer.

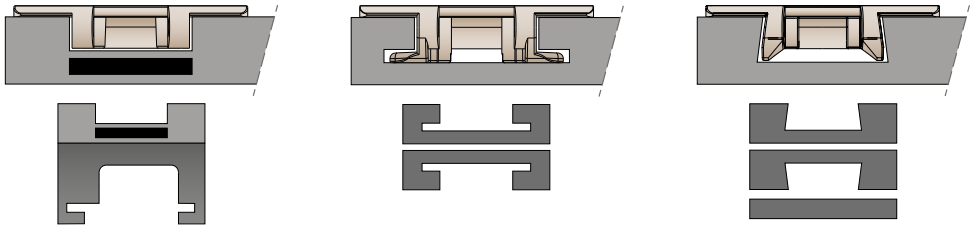

Get in touch with us and ask a personalized quotation.

Corner tracks systems

Magnetic **TAB** **Bevel**

Magnetic corner tracks are the most effective and reliable system for the table top conveyor design. The magnets provide the correct magnetic field to hold the chain on the corner track and this provides a flat carrying surface for the chain; thus, improving product stability and properly supporting the product.

TAB type corner tracks are a more economical solution compared to magnetic curves. In those applications where cleaning and product support are less important, they can perfectly be used.

Bevel corner tracks are another alternative to magnetic and TAB corner track solutions. Compared with TAB system it is more accessible but an additional support in the return is required.

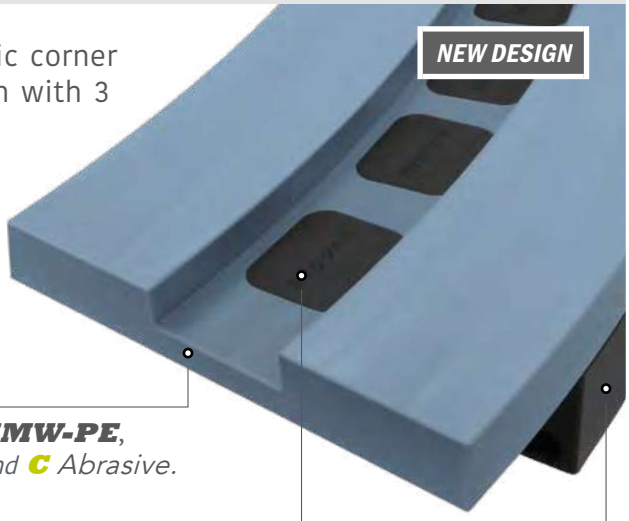

SOLID MAGNETIC CURVES

For 520 M modular belt and 882/8857 plastic chains.

THE NEW STANDARD DESIGN*.

With the main focus on quality, Movex magnetic corner tracks provide high performances in combination with 3 different materials, specific for each application: traditional, dry running and abrasive.

The new design offers better performances, a magnet field optimization up to 35%, and a production process improvement.

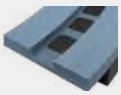

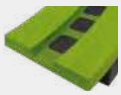

* 550 PRO M magnetic curves maintains the same design with magnets positioned at the bottom of the curve.

Three materials available:

Depending on application conditions various curve materials are suitable.

UHMW-PE 
STANDARD
For Lubricated steel and plastic chains and belts.

BluLub® 
HIGH-PERFORMANCE
For dry running or limited lubrication and higher speeds and loads.

C Abrasive 
EXTREME CONDITIONS
For dry running steel chains and polluted circumstances.

On request, further customisations can be realised in order to meet your technical requirements:

Custom holes
(through, countersunk, counterbore)

Thread bushings M6, M8 and M10
(brass of zinc plated steel)

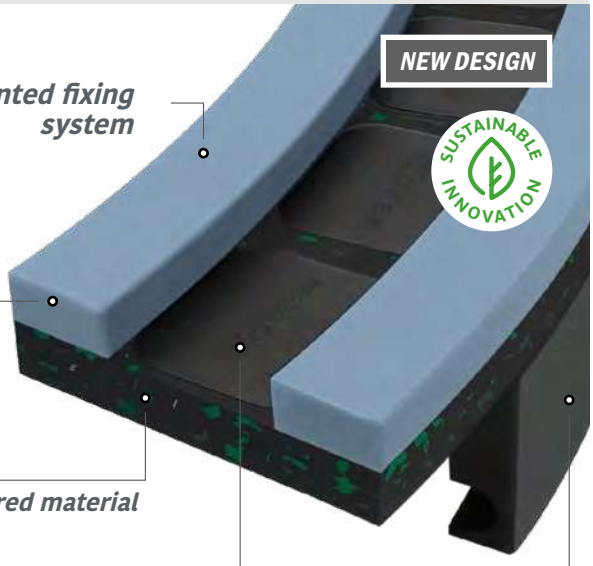

Special executions
(asymmetric curves, custom radii, widths, and angles)

RS MAGNETIC CURVES

For 240XE/260/261/879/880/881 and 882/8857 plastic chains.

THE NEW STANDARD DESIGN.

New design and best performance!

This design introduces replaceable guides.

The use of a recycled material it's an important path for a sustainable choice.

Main features:

Improved magnetic field

The consistent distance between the magnet and the chain ensures a constant magnetic field that reduces the annoying "stick-slip" effect. The new magnet cassettes include a double lip system.

+27% MAGNET FIELD OPTMIMIZATION*

Fast and easy maintenance

Thanks to its patented RS, the easy replaceable **guides** simplify maintenance and reduce down-times.

STRONG PRESS FIT

Performance up to 90Kg/10cm

Interchangeable guides

In case of required replacement, guides can be ordered as handy **replacement kit** available in three different interchangeable materials, and easily installed without removing the curve from the conveyor: BluLub®, UHMW-PE, and C Abrasive.

3 GUIDES MATERIALS WITH 3 DIFFERENT FEATURES

Saving resources

The new design and the guides replacement kit, are extremely useful to reduce purchase and maintenance costs, thus also improving the TCO.

UP TO 35% ENERGY REDUCTION*

Three versions available:

* Compared to the previous version.

RS EQUIPPED WITH **BluLub® Guides**

RS C EQUIPPED WITH **C Abrasive Guides**

RS H EQUIPPED WITH **UHMW-PE Guides**

*The color of **Recycling multicolored material** can vary depending to the the composition of raw materials used.*

RS Kit replacement procedure

For RS version magnetic curves.

The kit replacement procedure can be done with the curve still mounted in the conveyor, this saves time and costs, with easy troubleshooting.

• Remove the worn guides from the top of the curve.

This can be done by inserting a flat screwdriver between the guide and the support base **[1]**, and with the help of a hammer, leverage all the way round to lift the guide **[2]**.

• Install the new guide on the support base.

Place the new guide in the appropriate seat **[3]**, and using a soft hammer hit gently stab its upper surface the guide **[4]**. Make sure guide is firmly seated in the slot.

Now the guides are mounted properly and the conveyor can be reassembled.

Turn off and lock-out the conveyor power before proceeding with the replacement of the guide, and ensure that the chain ends cannot slip away because of its weight.

Scan to see the correct ***RS MAGNETIC CURVES*** replacement procedure.

SUSTAINABLE TIP

Remember, the worn guides should be deposited in the appropriate container for a proper recycling.

ETC EASY TRANSFER CURVES

For 240XE/260/261/878/879/880 and 881/8811 steel chains.

THE NEW STANDARD DESIGN*.

Easy transfer curves are used to remove head to tail transfers, particularly complicated with unstable products.

Conveyed products can easily change tracks with a controlled-side-to-side transfer, guaranteeing the maximum efficiency of the line.

Movex easy transfer curves are available for magnetic and TAB chains with two different designs: full version (easier to be installed) and slim version (economical choice).

See product page to find the one that would best suit your needs.

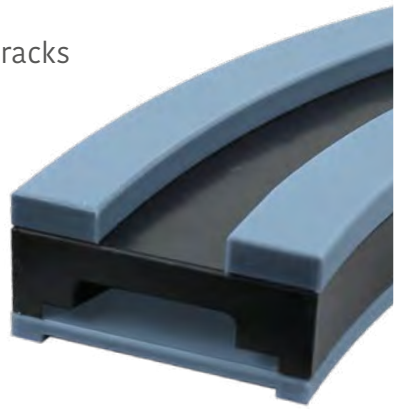

RS PRO MAGNETIC CURVES

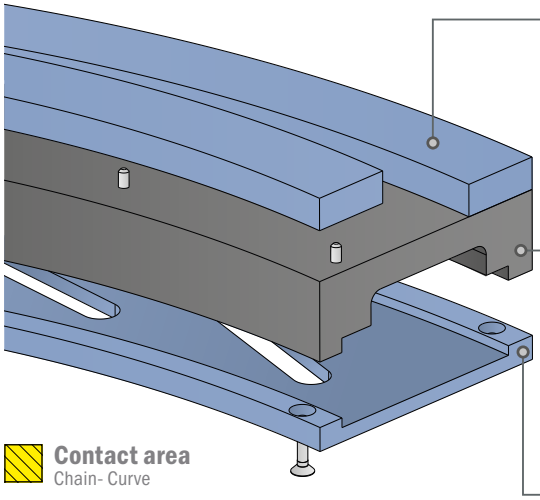

PATENTED

A NEW CONCEPT OF MAGNETIC CURVE.

RS PRO is a patented system that consists of machined plastic curve tracks equipped with permanent magnets with a new curve return concept.
This new return section-plate provides a total support of the chain or belt in the return of the curve.

RS PRO is equipped with guides in **BluLub®**, which contributes to improved PV-properties and reduce the energy consumption especially in applications with limited lubrication or higher loads.

Guides made in BluLub®

The assembly system reduces the maintenance-time in case of replacement and **BluLub®** material guarantees great performance and due the lower friction which also improves the product stability and wearlife of chains and belts.

Return section made in Standard UHMW-PE

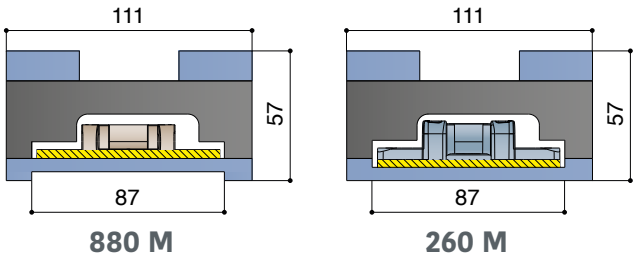

The return section of the **RS PRO** curve is designed to reduce the distance between chain and magnets; ensuring steady magnetic force and keeping the chain in the correct position.

New support plate made in BluLub®

The new return-section plate creates a full support of the chain or belt in this return-section.

RS PRO patented curves can be used for **880 M, 240 XE** and **260 M** chain-belt.
Depending on the installation of the return-section plate, the correct space is created in the return.

Basically, two executions in one design!

• Lower Friction • Less Wear • Easy to maintain • Lower TCO • Less Energy • Easy to install

RS CRATES

SPECIFIC FOR HIGH LOAD APPLICATIONS.

RS CRATES is the perfect solution for all the applications but specific abrasive conditions, able to guarantee great functionality even under high working load.

Availble in **BluLub®** and **C** *Abrasive*, on request.

Magnetic corner tracks

The dimensions in the tables are expressed in millimeters.
*Other curves widths are available on product page.

PFX

The best choice for dry running applications.

RANGE EXTENSION

Other different types of product in PFX are on request.

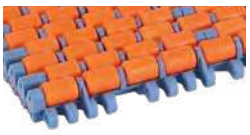

PFX is the plastic material specifically developed for chains and belts in order to run with limited lubrication or in dry applications where the demands are extreme concerning speed, performance & efficiency. Contact us, and request a free quotation!

Low friction
Developed to reduce friction between chain and product, and chain and wearstrip.

High performance
Longer wear life lead to excellent and long enduring product handling features.

Minimal dusting
Developed to avoid dusting under extreme circumstances.

Control of cost
Better control of total cost & sustainable conveyor technology.

Food contact Certified
PFX material is suitable in food application.

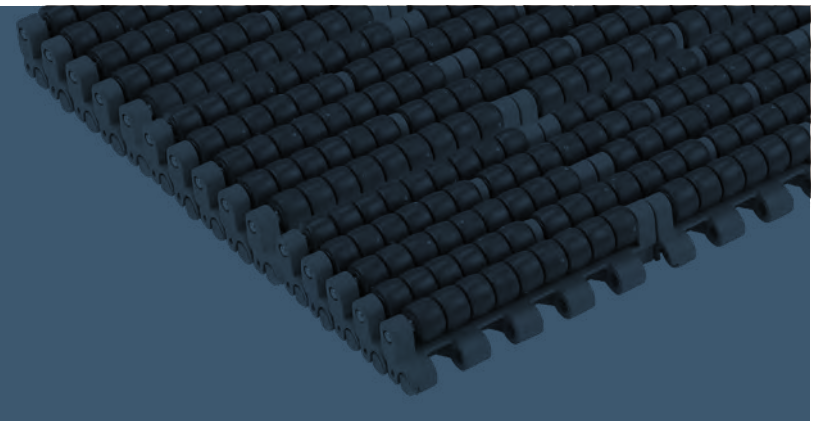

Patented material
PFX is an exclusive product of Movex.

Energy saving | **Low friction** | **High efficiency** | **High visibility**

FDA APPROVAL

***Belts wider than standard are available with 3 inch increments.**

The nominal tensile strength and the nominal width tolerance are valid for a temperature of 23°C (73 °F).

The actual width of the belt typically falls below the nominal value by 0.1% to 0.3%. For POM belts up to 750 mm (30”) in width, the shrinkage ranges from -3 mm to 1 mm, and for those wider, from -0.35% to 0%.

Non-Standard belt widths are incremented by 25.4 mm (1”). The minimum width is 50.8 mm (2.0”).

7870 FT MOVEX TOOL
Developed to facilitate belt assembly and disassembly.

Article Nr. 29969

Metric Size

***Material**

LFA - Code 01
Low friction Acetal

Easy Delivery

Max w. load:	25500 N/m
Weight:	7,8 kg/m²
Temp. range dry:	-40÷80 °C
Temp. range wet:	-40÷65 °C
Pin material:	PBT white

MX - Code 03
Performance PBT

Max w. load:	20000 N/m
Weight:	7,5 kg/m²
Temp. range dry:	-40÷120 °C
Temp. range wet:	-40÷60 °C
Pin material:	POM grey

MPX - Code 25
Lubricated Acetal

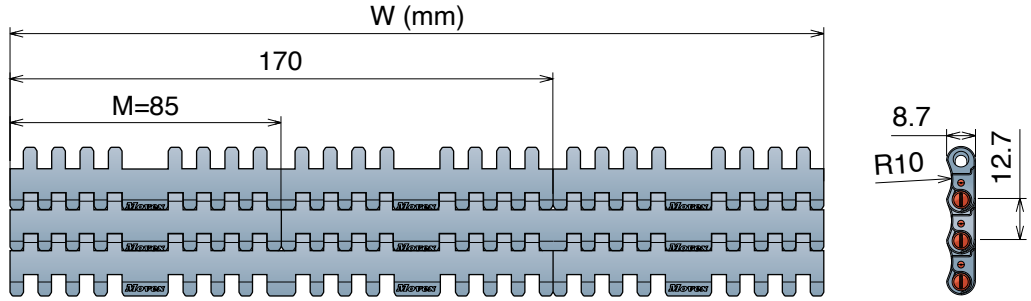

Max w. load:	25000 N/m
Weight:	7,8 kg/m²
Temp. range dry:	-40÷80 °C
Temp. range wet:	-40÷65 °C
Pin material:	PBT white

PFX - Code 30
Extra performance PBT

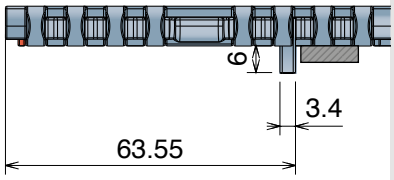

Max w. load:	20000 N/m
Weight:	7,5 kg/m²
Temp. range dry:	-40÷120 °C
Temp. range wet:	-40÷60 °C
Pin material:	POM grey

MAGNETIC SYSTEM

Pin Sphere® AUTOLOCK
- Easier installation • Quicker maintenance
- Interchangeable with previous design

***Material**

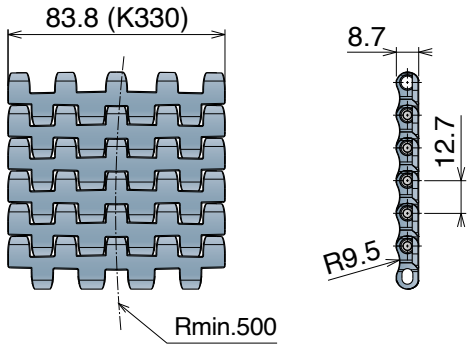

LFA - Code 01
Low friction Acetal
Easy Delivery
Max w. load: 2500 N
Temp. range dry: -40÷80 °C
Temp. range wet: -40÷65 °C
Pin: Ferritic stainless steel

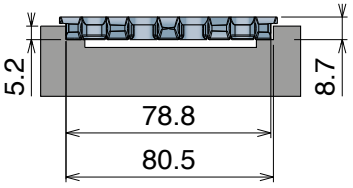

MX - Code 03
Performance PBT
Max w. load: 2000 N
Temp. range dry: -40÷120 °C
Temp. range wet: -40÷60 °C
Pin: Ferritic stainless steel

PFX - Code 30
Extra performance PBT
Max w. load: 2000 N
Temp. range dry: -40÷120 °C
Temp. range wet: -40÷60 °C
Pin: Ferritic stainless steel

THE BEST CHOICE FOR DRY RUNNING APPLICATIONS

Version A - Standard

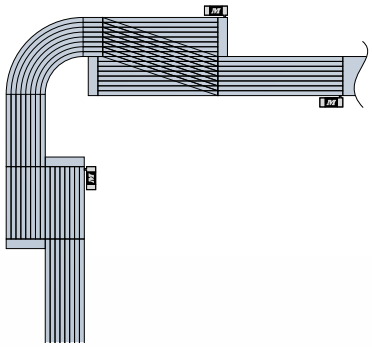

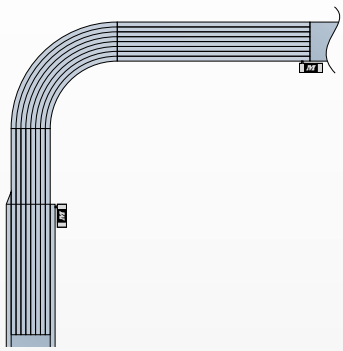

Advantages:
- No conveyor side transfers required
- Space savings
- Less components required
- Less drives required

Backflex radius min.: 25 mm

The new **Movex® 553 FlexTop** modular belt with self-locking spheres is specifically designed for high-precision material handling, suitable for several applications like logistic centers, packaging stations (food and beverage) and corrugated industries, easily to be integrated into existing systems. The 360° movement possibility makes the belt suitable for diverting, rotation, accumulation and acceleration applications and minimize required maintenance and downtimes. The small pitch between the spheres allows every type of product transfer and is ideal for small and light packages, unlike traditional roller conveyors.

The complete closed sliding belt surface is the perfect solution to carry carton boxes, crates, cans and bottles shrink-wrap packaging and any kind of polybag with Top-Accuracy package control. **553 FlexTop is best choice for material handling applications!**

High strength

Perfect product control

Self cleaning

Great versatility

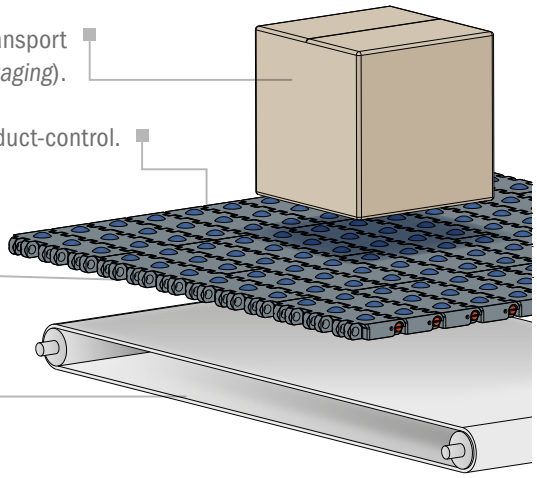

Long durability

Design and features of 553 FlexTop make it ideal for the transport of several type of products (*e.g. polybags, shrink-wrap packaging*).

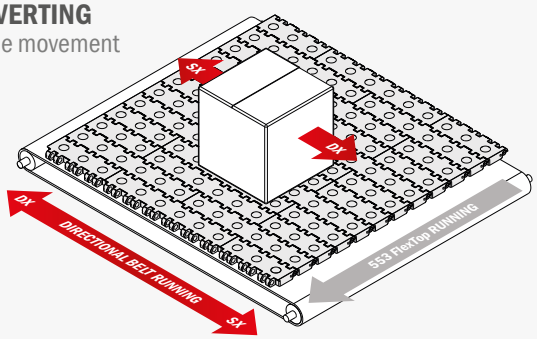

The small pitch between the spheres allows for a great product-control.

A complete closed sliding surface, in combination with self-locking spheres, makes the belt design flexible and robust.

The directional belt underneath the flextop belt controls the direction and the speed of the spheres, making this belt 100% versatile.

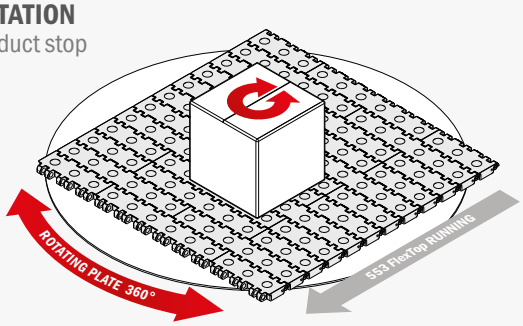

DIVERTING
Side movement

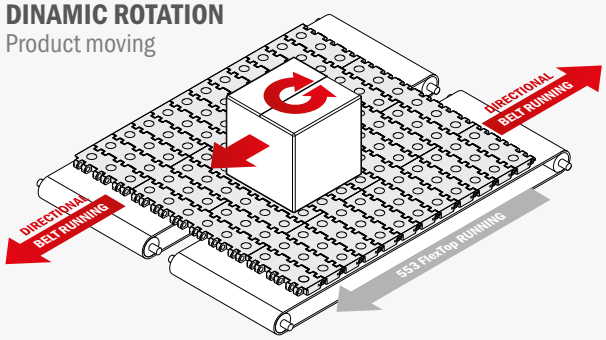

By using a directional belt underneath the Flextop belt, running square to the travel direction, the product can be transferred left and right.

ROTATION
Product stop

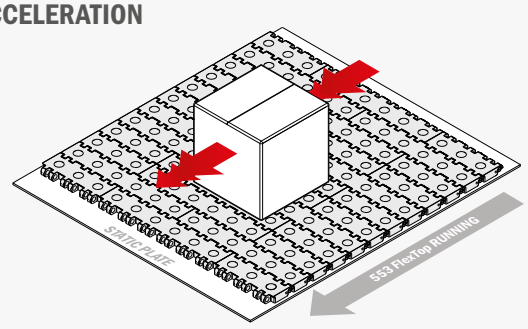

By using a rotating plate underneath the Flextop belt, sphere can rotate by 360°. This option can be used with product stopped or running on the belt, to easily positioning the product.

DINAMIC ROTATION
Product moving

By using two auxiliary belts underneath the Flextop belt, running at opposite direction, the product will start rotating. With this option the Flextop belt can keep running.

ACCELERATION

By using a static plate underneath the Flextop belt, spheres will start rotating indipendently, so the speed of the product will result double than the speed of the belt itself.

*Material

LFA - Code 01
Low friction Acetal

Max w. load:
Straight: 30000 N/m
Curve 2000 N
Weight: 7,7 kg/m²
Temp. range dry: -40÷80 °C
Temp. range wet: -40÷65 °C
Pin material: PBT white
Top rubber: 50 ShA-Dark grey

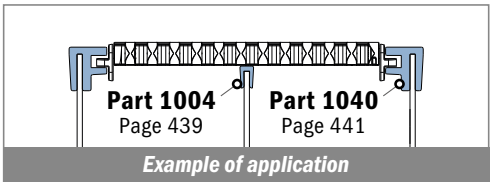

LFB - Code 23
Low friction Acetal

Max w. load:
Straight: 30000 N/m
Curve 2000 N
Weight: 7,7 kg/m²
Temp. range dry: -40÷80 °C
Temp. range wet: -40÷65 °C
Pin material: PBT white
Top rubber: 50 ShA-Black

PPB - Code 24
Polypropylene

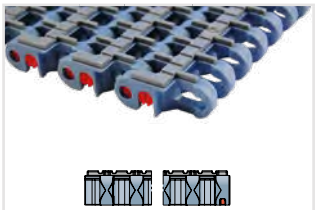

Max w. load:
Straight: 19500 N/m
Curve 1300 N
Weight: 6,0 kg/m²
Temp. range dry: 4÷104 °C
Temp. range wet: 4÷104 °C
Pin material: PP blu
Top rubber: 50 ShA-Black

Features

Inner radius: *600 mm ÷ 2000 mm*
Belt width: *200 mm ÷ 1600 mm*
Angle: *90° and 180° (different on request)*
Row to row angle: *1,33°*
Pin material: *Ø4,7 mm, PBT White*
Open Area: *0%*

Movex® **Zero Contact™** modular fixed radius curve belt is the best choice for all type of transportation, for beverage, food and logistic industries, thanks to its versatility.

It offers high performances, reducing the coefficient of friction between product and running belt surface and improves the efficiency of the line, by minimizing dowtimes.

A wide range of radii and widths helps finding the right solution for every product dimension and transportation condition, from light packages to heavier ones.

Installation and maintenance have never been so easy, so far.

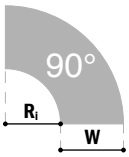

The belt is compliant to: • **Regulation: D.P.R. 777 - 23 August 1982 e D.L. 108 - 25 January 1992;** • **UNI EN 1186 1÷15:2003**
• **D.M. 34 del 21.3.73 S.O. GU n° 104 - 20/04/73 and following updates** • **Regulation (EU) n. 10/2011, GUUE L 12 del 15/01/2011 and following updates.**
• **Regulations (CE) n. 1935/2004 GUCE L 338 del 13/11/04 and n. 1895/2005 GUCE L 302 - 19/11/2005.**

Low friction | **Minimized maintenance** | **Easy pin removal**

The innovative design of ***Movex®* Zero Contact™ PRO** is recommended for high speed, heavy loads and transportation of abrasive substances, like sand, salt, sugar, and many other applications.

The stainless steel pins guarantee a higher working load and due to the new pin retention with grub screw, the assembly of this belt is 100% secure.

The robust structure of **Zero Contact™ PRO** can be summarized in minimal maintenance, long life expectation and high reliability.

Zero Contact™ PRO is a versatile belt, allowing a wider range of available widths and radii. Find out also our "two-tracks" version.

D-Shape - Pin locking system

Simple
Easy to insert and release,
even when it's already installed.

Reliable
It's engineered to operate without jamming.

Safety system
When pin is inserted, it's locked in and can be removed only when needed.

Main Improvements compared to the 260M belt/chain

-38% Chain weight
+24% Energy saving
-15% Carbon footprint
+15% PV limit

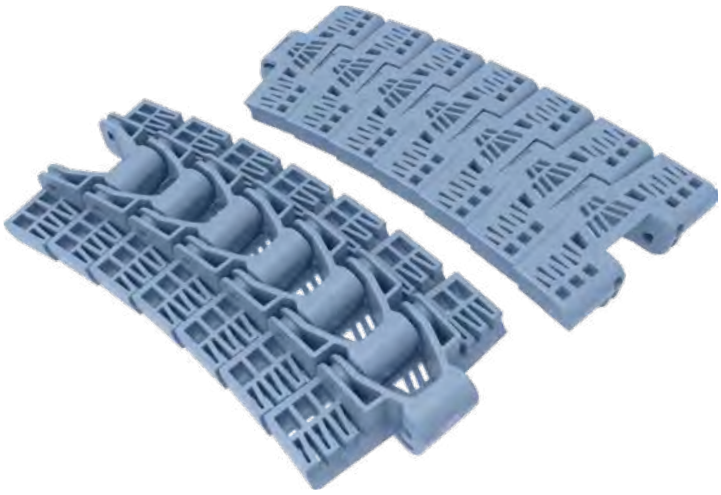

NEW **240 XE FG** **Open Surface 25%** Catena curvilinea
Sideflexing belt/chain / Kurvengängige Mattenkette

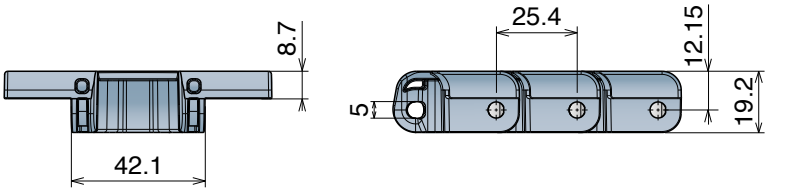

MAGNETIC SYSTEM

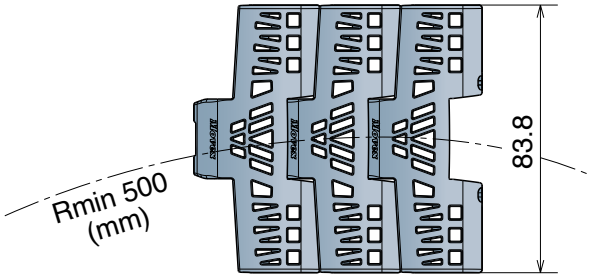

Delivery: Easy | Standard — **Pins:** Ferritic SS | **Backflex radius min.:** 130 mm

Interchangeable with 260M series

25.4mm PITCH

BluLub® & PFX
Powerful dry running combination
The use of both our exclusive materials unleashes extra-performance and an astounding speed!
UP TO 150 m/min!

NoseBars

RANGE EXTENSION

Movex NoseBars improve the efficiency of your production line.

Small products are becoming a challenge when they have to be transferred from head-to-tail, especially when they don't have a flat base like cans and petaloid bottles.

This is becoming even more critical when the line capacity is pushed to the limit and speeds or operating hours could compromise the required efficiency.

Movex NoseBars are the best solution for a combination of short transfer and high performance.

Moreover, they will let your line:

- **Running with limited maintenance**
- **Exceeding in performances**
- **Achieving high speeds and loads**

Paying specific attention during the development as well as during the automated production, together with our constant quality control checks, we have reached these features which can be reflected to all Movex products.

Movex NoseBars are suitable for all applications and conditions. Made from super-performance ***BluLub®***, for a reduced coefficient of friction, the smallest gaps are reached between the belts to assure a smooth and precise transfer.

Movex NoseBars are available in three different versions: standard, with rollers and with bearings. Specific the executions with rollers and bearings are ideal for high speed and/or high load applications.

Less friction, longer lifetime, less belt elongation and less maintenance are facts which makes the Movex NoseBars reliable and long-lasting products.

Find out the best combination for your application with our modular belts and NoseBars in the selection chart at page 306.

Blulub®

Do you know what it is?

All Movex NoseBars are made with a compound developed by Movex, the ***Blulub®***, a special high-performance material which contains the latest generation of solid lubricants.

The use of products made in ***Blulub®*** is designed for applications with limited lubrication, higher speeds and/or higher loads.

Blulub® requires less energy and with its lower coefficient of friction, improves the product stability and wear life of modular belts.

One piece

PATENTED

Custom made NoseBar, supplied in a single piece.

One piece is the patented system from Movex that reduces the required conveyor maintenance time drastically.

One piece is very quick to install and easy to clean!

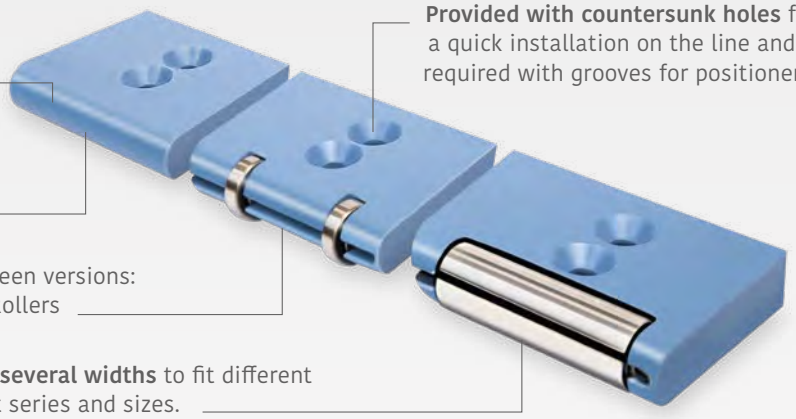

More info at page 316 > 318

All Movex **NoseBar are made in Blulub®**, with the latest generation of solid lubricants.

High precision machined part with reduced tolerances over nose radius and flatness.

Complete interchangeability between versions: Standard, with Bearings and with Rollers

Available in several widths to fit different modular belt series and sizes.

Provided with countersunk holes for a quick installation on the line and if required with grooves for positioners.

Three different options, fully interchangeable:

Standard
GENERAL APPLICATIONS

Static NoseBars with unique properties due the special Movex *BluLub®* compound are the ideal choice for any type of application, help improving the line efficiency, reducing dust and the frequency of maintenance.

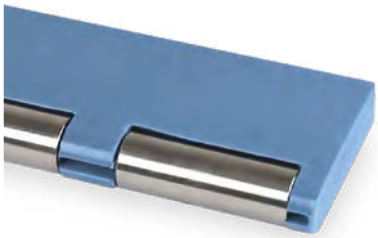

- Available diameters: **6 / 19 / 22 mm**
- Available also with grooves for positioners
- Can be machined to width, according your needs

with Bearings
HIGH-SPEED APPLICATIONS

Dynamic NoseBars with Bearings help improving the line efficiency and grant a longer life compared to traditional ones, minimizing the coefficient of friction and generating less wear. The rotating chrome steel bearings create an improved situation specific for high-speed applications.

- Available diameters: **19 / 22 mm**
- Available also with grooves for positioners
- Can be machined to width, according your needs

with Rollers
HIGH-LOAD APPLICATIONS

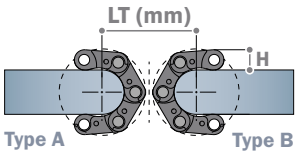

Dynamic NoseBars with Rollers and bearings are long-lasting component that increase the efficiency of the processing line. Thanks to its sturdy stainless steel rollers, they are also the ideal choice for heavy load applications or high abrasive working conditions like dusts, liquids, etc.

- Available diameter: **19 mm**
- Available also with grooves for positioners (only for 521 FT)
- Can be machined to width, according your needs

How to use Movex 530 LBP double-face Nosebar

Idler Side

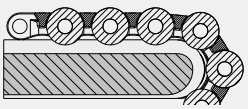

Active Side

Movex 530 LBP Nosebars are special Nosebars, specific to optimize the characteristics of this particular belt. It can be installed in two different ways: **idler side** and **active side**, depending if you want to obtain the accumulation or acceleration effects of the goods. In both modalities the same Nosebar is used: it simply needs to be installed on one side rather than the other. One face of the Nosebar is set up for the accumulation function and the opposite one for the acceleration function.

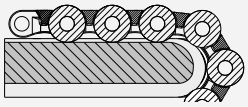

V = X

Idler System (sectional view)

The nosebar allows the belts rollers to remain raised above the surface, free to roll.

V = 2X

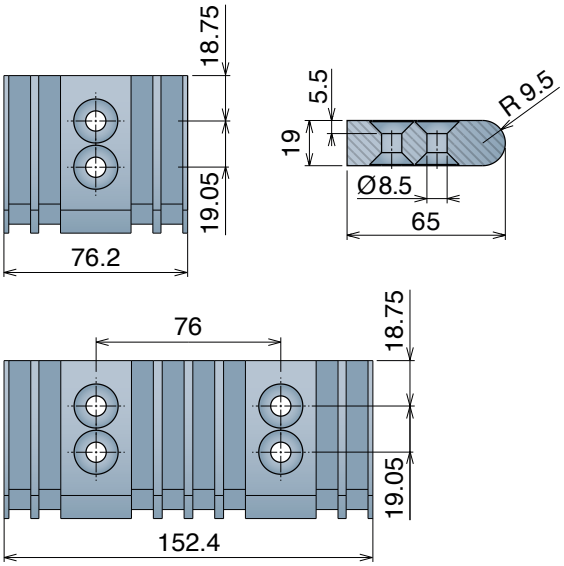

Active System (sectional view)

The nosebar allows the belt rollers to touch the surface, increasing the speed of the goods.

How to use Movex 530 LBP and Pro LBP double-face Nosebar

Movex 530 LBP and Pro LBP Nosebars are special Nosebars, specific to optimize the characteristics of this particular belt. It can be installed in two different ways: **idler side** and **active side**, depending if you want to obtain the accumulation or acceleration effects of the goods. In both modalities the same Nosebar is used: it simply needs to be installed on one side rather than the other. One face of the Nosebar is set up for the accumulation function and the opposite one for the acceleration function.

Idler System (sectional view)
The nosebar allows the belts rollers to remain raised above the surface, free to roll.

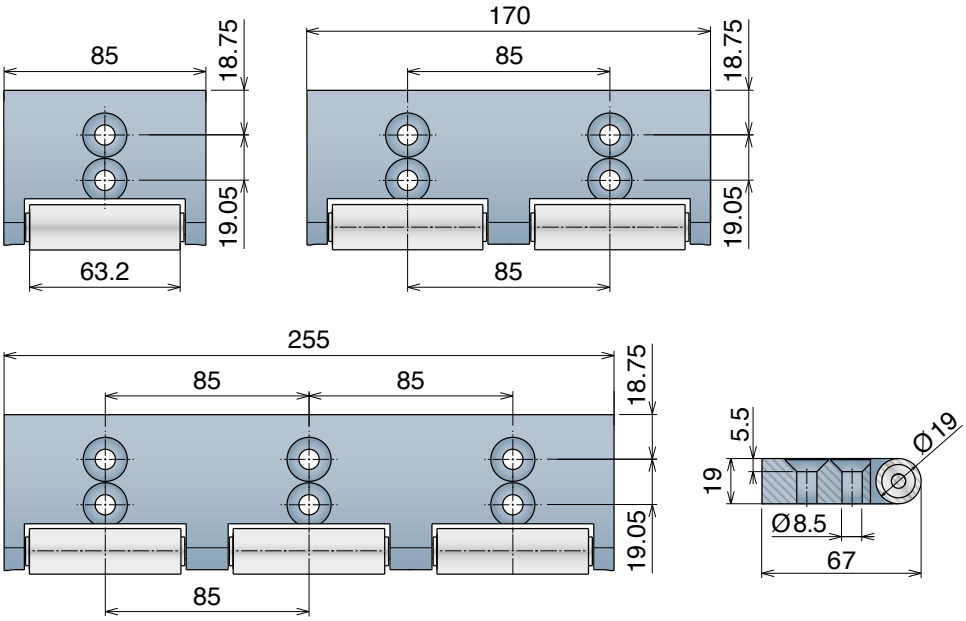

Active System (sectional view)
The nosebar allows the belt rollers to touch the surface, increasing the speed of the goods.

Product use

Zero Contact™ curve conveyor is available in different widths with a closed-top surface capable of handling a variety of package sizes, types and configurations including delicate products and applications found on shrink wrappers.

Zero Contact™ is designed to be used for the transport of various sized parts, is suitable for food and beverage industry thanks to the FDA approval, and helps reducing energy consumption and improving the line efficiency. It can be easily connected to existing layout.

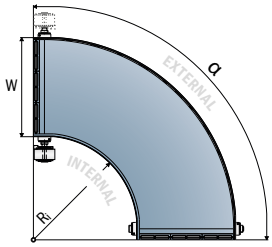

INNER RADIUS 600mm ÷ 2000mm

ZERO FLAT EDGE ZC CONTACT

CURVE CONVEYOR

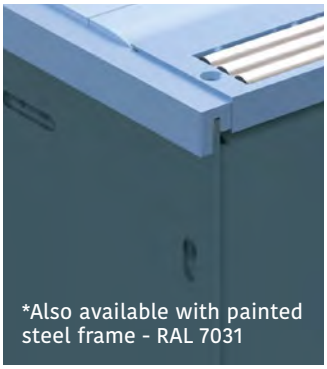

Product use

Zero Contact™ Flat Edge is the advanced curve conveyor system designed for versatility and efficiency. With a reduced offset distance between profiles and the top of the modular belt, it handles wide packages with ease and accuracy. Its bidirectional design and central drive ensure quick direction changes, while its energy-efficient operation reduces costs and environmental impact.

Zero Contact™ Flat Edge optimizes line efficiency and minimizes downtime, also for corrugated and wood industries.

Bi-Directional

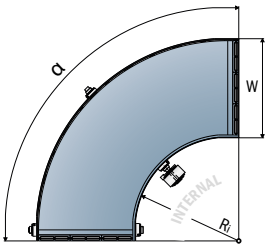

*Also available with painted steel frame - RAL 7031

INNER RADIUS 600mm ÷ 2000mm
BELT WIDTH 200mm ÷ 1600mm
MATERIAL OF MODULES Acetal (POM)
COLOR OF MODULES Pigeon Blue (RAL 5014)
PINS PBT White
PIN LOCK Clips
FRAME Stainless steel

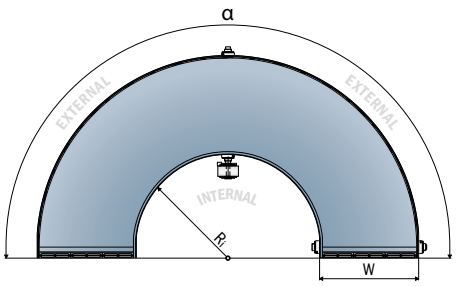

TEMPERATURE RANGE
-5°C ÷ 45°C non condensing
(23°F ÷ 113°F non condensing)
MAX. WORKING LOAD
13.500 N/m belt width
CURVE ANGLE 90°/180° (different on request)
OPEN AREA 0%

CURVES RANGE
Angle 90°

ZERO 520 CONTACT

CURVE CONVEYOR

Product use

Specifically designed for industrial environments with critical hygienic level, Movex® **Zero Contact™ Hygienic** is the perfect solutions for dairy, food, chemical and pharmaceutical industries, subjected to daily washing cycles.

Movex® **Zero Contact™** modular belt is approved for direct food contact by FDA. Any bulk food product can stay on the modular belt without contamination. With reference to the foodstuff categories detailed by Reg. (EU) No. 10/2011.

ZERO PRO CONTACT

CURVE CONVEYOR

Product use

Zero Contact™ PRO is the right choice for heavy duty applications with high abrasive conditions, like sand, salt as well as production of tiles, bricks and cement production or applications where speeds and loads result very high.

Zero Contact™ PRO is designed with different dimension and features, so to guarantee higher performance for hostile environments:

- The belt in Polyamide glass fiber reinforced, more resistant to high wear conditions
- The rods in stainless steel and fixed by using grub screws guarantee high loads

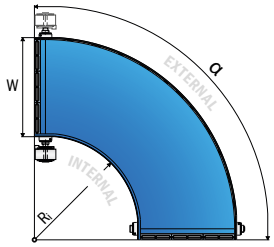

INNER RADIUS 586mm ÷ 1541mm
BELT WIDTH 249mm ÷ 1034mm

TWO TRACKS VERSION

Product use

Zero Contact™ PRO is available also with **"two-tracks"** design; by keeping the same advantages of the **Zero Contact™ PRO**, with the **Zero Contact™ PRO "two tracks"** the maximum working load can be even higher thanks to the increased number of bearings.

Moreover, the two belts can work at different / independent speeds and can be activated independently thanks to the double shaft.

The two belts can also be used for goods acceleration or can be also stopped independently, in case there is a double track infeed conveyor.

Separate belts offers the possibility of different/ higher speeds

2 different bearing-tracks guarantee extreme load, even at higher speed

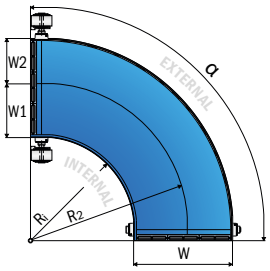

INNER RADIUS 586mm ÷ 1011mm
BELT WIDTH 524mm ÷ 1034mm
MATERIAL OF MODULES Polyamide glass fiber reinforced (PA)
COLOR OF MODULES Dark Pigeon Blue (RAL 5017)
PINS Stainless steel
PIN LOCK Stainless steel grub screws
FRAME Stainless steel

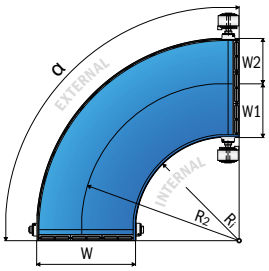

TEMPERATURE RANGE
-5°C ÷ 45°C non condensing
(23°F ÷ 113°F non condensing)
MAX. WORKING LOAD
21.000N/m belt width
CURVE ANGLE 15° ÷ 360°
OPEN AREA 0%

CURVES RANGE
Angle 90°
Double-Shaft

ZERO 510 ATP

ACTIVE TRANSFER PLATE

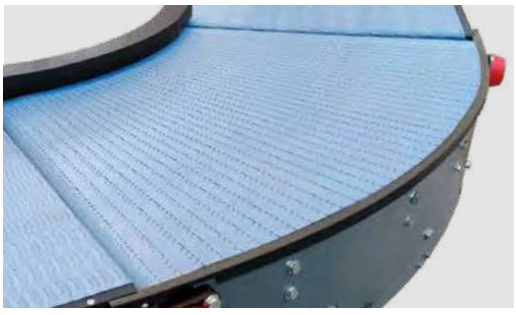

The **Zero ATP** is the perfect solution for small and light products, which hardly slide on standard solution. With the Active Transfer Plate Movex helps reducing downtimes and improving efficiency.

Zero ATP is a complete conveyor unit and supplied connected to the **Zero Contact** ™ curve independently, so speed can be different than the curve itself, so able to accelerate or decelerate carried products.

Zero ATP Active Transfer Plates are equipped with Movex 7870 FT micropitch belt.

A tensioning system is included.

Main features

- 8mm pitch, 3mm nose radius
- Available length 250mm and 500mm
- Tem. Range: -5°C ÷ 45°C non condensing
- Connectable to Zero Contact curves

DIFFERENT BELT SURFACE AVAILABLE ON REQUEST

For different configurations and 7870 modular belt surface (Flush grid, Diamond top, Cone top, Non slip), please contact your sales representative.

ZERO PRO ATP®

ACTIVE TRANSFER PLATE

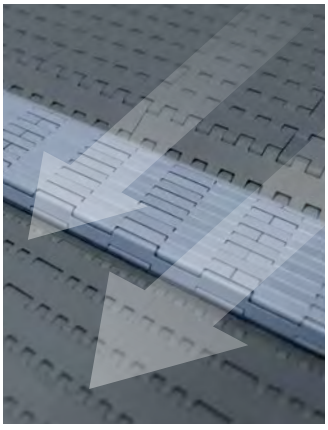

Product use

Zero ATP Pro® equipped with micro-pitch 7870 modular belt series, is the smallest Active Transfer Plate available on the market.

With its revolutionary compact shape, **Zero ATP Pro®** is the right choice to connect different conveyors, guaranteeing a smooth product transfer, that can be easily integrated into existing lines by replacing traditional transfers, with limited structural work.

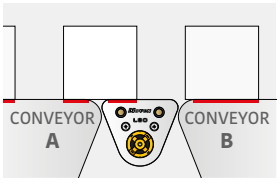

Zero ATP Pro® can be provided with mini-motor or key shaft for a roller chain drive and it's a maintenance and tensioning free system.

DIFFERENT BELT SURFACE AVAILABLE ON REQUEST

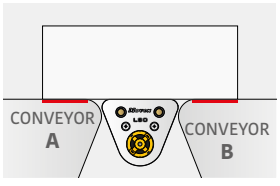

BELT SERIES 7870 FT
BELT WIDTH 6in ÷ 24in (152,4mm ÷ 609,6mm)
BELT DIMENSIONS Pitch 8mm Thickness 6mm
MATERIAL OF MODULES LFA, MX and LFB
TRANSFER LENGTH 80mm or 150mm
TRANSMISSION Mini motor or Keyed shaft
MAX. WORKING LOAD 3.000 N/m belt width

SIMULTANEOUS TRANSPORT OF:

LIGHTWEIGHT & SMALL GOODS

HIGH LOAD & BIG GOODS

Plug-in & Play solution | Maintenance free | Self-tensioning

553 SORTER+

MULTIDIRECTIONAL CONVEYOR

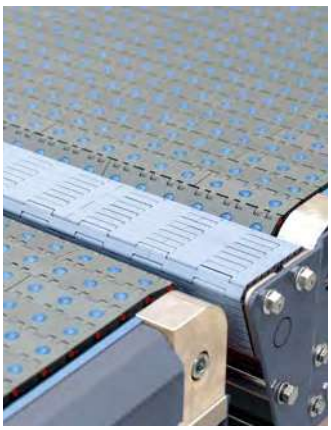

Product use

The **553 Sorter plus™** is a multidirectional conveyor, equipped with the unique and patented 553 FlexTop modular belt, and with directional belt or plate, is the ideal solution to transport countless types of products and for several types of industries. It can be easily integrated into existing systems.

The **553 Sorter plus™** is available in different widths and lengths and in two different versions:

- **Diverter** - able to quickly move side to side your goods
- **Static Turn** - able to rotate statically your goods

BELT PITCH: 25,4 mm
THICKNESS: 8,7 mm
INCREMENTS: 76,2 mm
TOTAL LENGTH: 600mm ÷ 1400mm
TOTAL WIDTH: 390mm ÷ 1000mm
MATERIAL OF MODULES: Dark grey acetal (POM)
MATERIAL OF SPHERES: Blue Polyamide (PA)

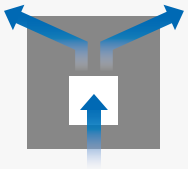

TEMPERATURE RANGE
-5°C ÷ 45°C non condensing
(23°F ÷ 113°F non condensing)
MAX. WORKING LOAD
27.500 N/m belt width
OPEN AREA 0%
FRAME Stainless steel or Painted steel

553 SORTER+

The new design has improved the performance of the conveyor, making it even more effective and customizable to meet the needs of the most demanding customers. The completely closed sliding belt surface is the perfect solution for carrying carton boxes, crates, cans and bottles, shrink-wrapped packaging, and any kind of polybag with top-accuracy package control.

Versatility is the watchword

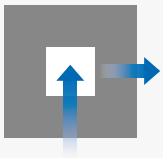

Available movement options

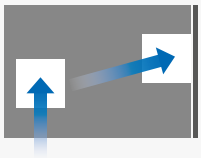

Diverter
Capable of moving your goods side to side (left and right).

Static turn
Capable of rotating statically your goods.

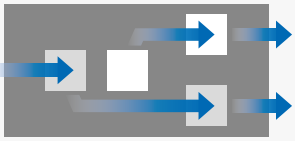

90° transfer
Capable of moving your goods at a 90° angle (left and right).

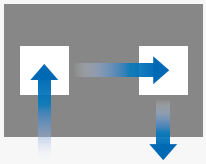

Aligner
Capable of moving your goods and aligning them with a lateral profile.

Merger
Capable of moving your goods and aligning them in a single row.

Diverger
Capable of moving your goods and dividing them in two rows.

U-turn
Capable of making a U-turn with your goods.
Available on request

Ideal for several products and industries

These are just some of the products that can be handled with 553 Sorter+, its versatility allows to transport countless types of products and for several type of industries.

553 Sorter+

Accessories and personalization

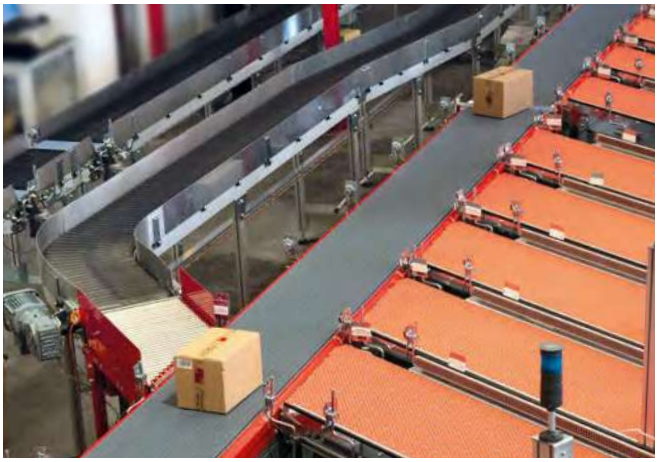

Slide chute

In option, we can provide sliders to any diverting point: the slide could be made of painted steel or stainless steel, ensuring compatibility with your operational requirements and environmental conditions.

Contact our expert for more information.

Low back pressure chute

In option, we can provide straight chute or angled chute with our Low back pressure modular belt 551 Pro LBP, designed to handle high-speed accumulation with minimal product damage.

Contact our expert for more information.

Custom personalization

The **Movex® 553 Sorter+** automatic sorting systems are reliable and cost-effective solutions designed to optimize logistics operations across a wide range of products and industries.

Our portfolio meets most market demands with standard solutions, ensuring short lead times for both units and spare parts. For specialized applications, we provide comprehensive support, including the design and development of customized solutions tailored to specific requirements.

What are you waiting for? Contact us for a free consultation today!

Do you need help to configure your 553 Sorter+?

Send an email with the filled form and the technical drawings of your layout (.stp/.dwg/.dxf) to **info@movexii.com**, or contact your sales representative.

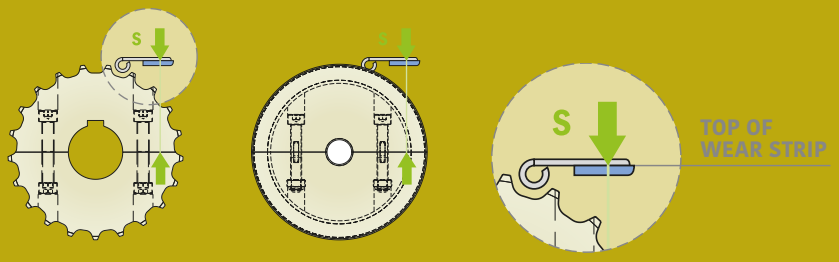

You will be contacted by one of our experts for a dedicated support and a customized quote based on your needs.

353

What is the S dimension?

It defines the distance between sprocket/idler (=shaft) center and top of wear strip.
It ensures smooth run of the chain at minimum noise level.

The value is specified for each type and size of sprocket in the tables on the following pages of the chapter.

For bore tolerance refers to Movex engineering manual available on our website.

Movex® EXTRUSION CENTER

We extrude for your business.

Movex® is a dynamic and flexible business reality that have been active in the industrial production for over ten years and is reaching market leadership as a reliable and precise supplier, planning the future without losing sight of its history and the values that allow its growth.

All our products are tested by our quality control team; monitoring, performance analysis and control of all processes are our main priorities. We are strongly committed to providing our customers with the highest quality.

We meet our customers' needs for both standard and customized products in a dynamic and proactive environment.

Choose the one that best suits you.

Movex® provides a new generation of high-performance profiles developed and produced with the most up to date technology. Experienced engineers work around the clock on more than 50 extrusion machines, perfecting almost 2.000 high-quality products of different types and sizes.

Movex® profiles are produced from top-quality ***UHMW-PE***, with the possibility of enhanced performance with the use of our super-performing materials ***BluLub®***, ***Titanium White®*** and ***AS***.

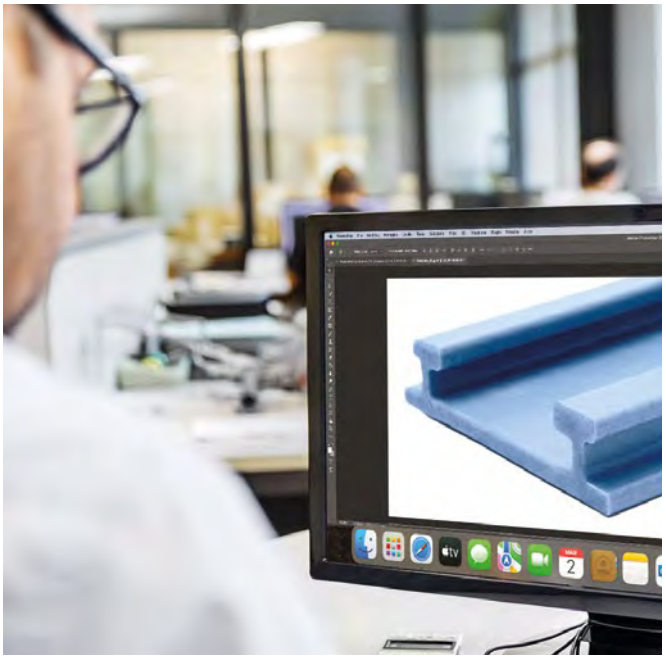

Standard or customized extrusion...your choice.

Movex® is driven by the will to design and manufacture top quality items, combining technical performance and design, in order to offer its customers a tailor made service.

Beside of the standard available profiles, ***Movex®*** is also developing together with the customer innovative special solutions to offer *"the product you need when you need it"* against an attractive price.

We have organized a specific workflow, developed over the course of the last ten years, which aims to satisfy the requirements of even the most demanding buyer. Get in touch with us and ask a personalized quotation.

DESIGN DEPT

PACKAGING DEPT

BORN TO **PERFORM**

BluLub® is the Movex super-performance compounded Ultra High Molecular Weight Polyethylene material, with the latest generation of solid lubricants, able to contribute improving PV properties (limiting pressure velocity) compared to standard UHMW-PE, especially in applications with limited lubrication, higher speeds and/or higher loads.

BluLub® ensures high wear and abrasion resistance, requires less energy and with the lowest coefficient of friction, improves the product stability and wear life of sliding parts.

Low Friction
Lowest coefficient of friction compared to traditional materials.

High Performance
Extreme material performances with high speeds and loads.

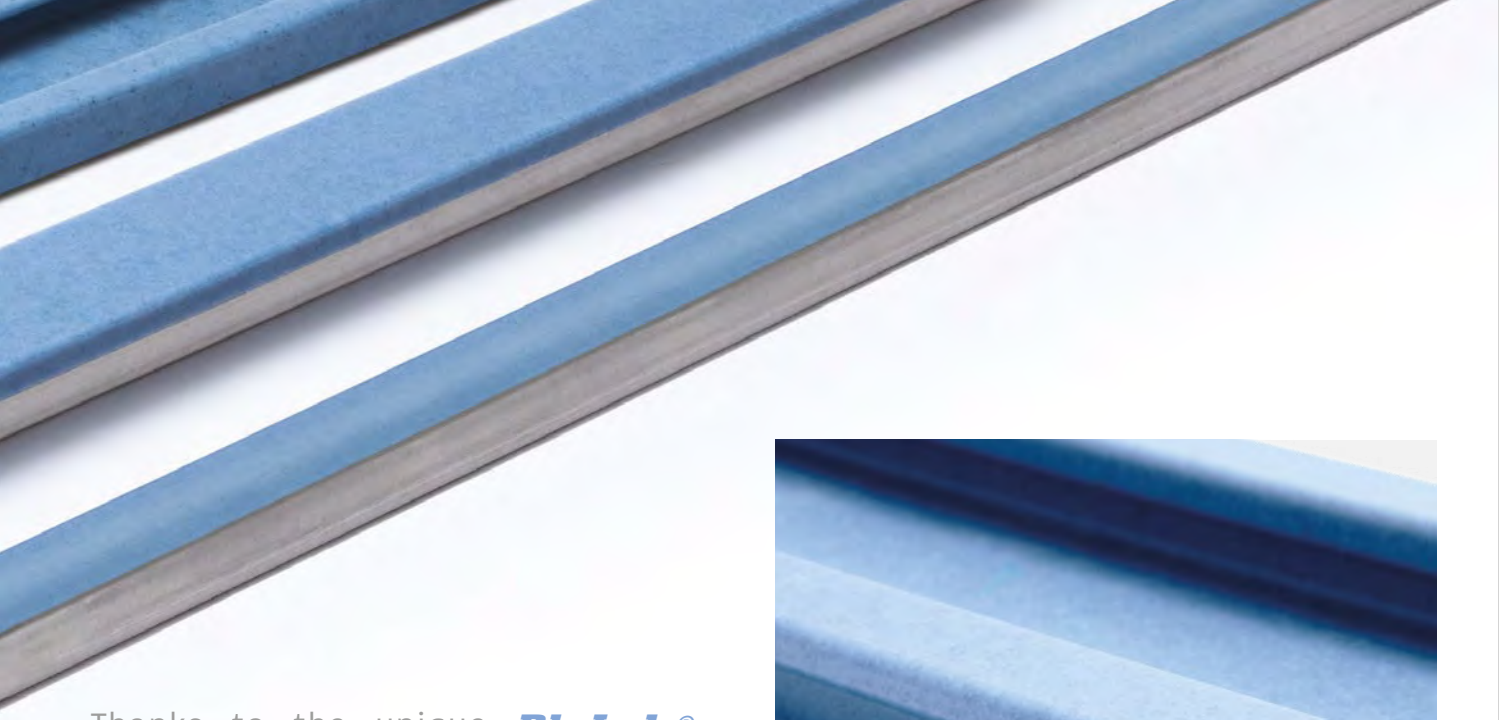

Molecular density:
9,200,000 g/mol.

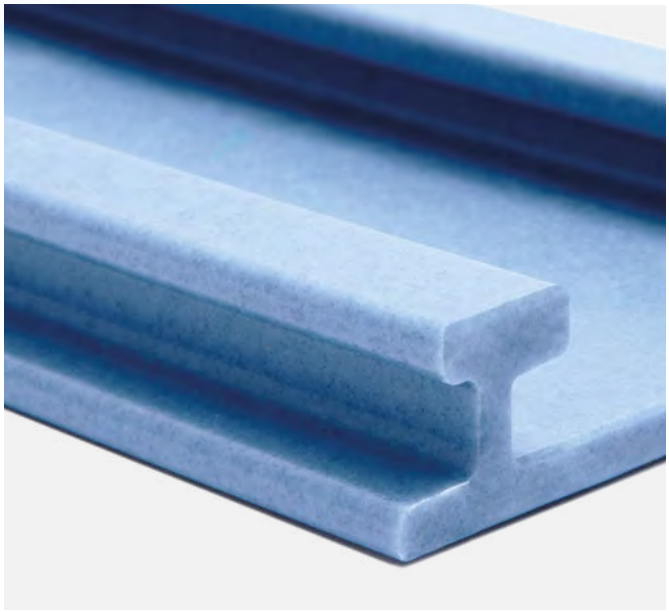

Operating temperature:
-40 to + 80°C (-40 to 176°F)

Linear expansion coefficient:
2 x 10-4°C-1 (1.1 x 10-4 °F-1)

FDA APPROVED

Thanks to the unique **BluLub®** characteristics, all the extruded profiles can offer several advantages like longer wear life, minimized dust generation and extreme noise reduction.
The recent test with the Technical University of Chemnitz, confirmed **BluLub®** being the best material available for dry running applications.

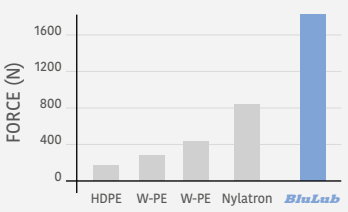

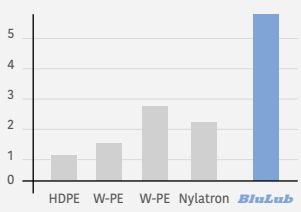

UP TO **80%**
ENERGY SAVING

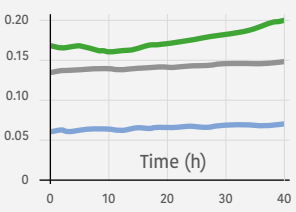

With lowest coefficient of friction and optimized sliding properties of **BluLub®**, the conveying power required, thus the energy consumption, can be extremely reduced.

PV LIMIT

RELATIVE WEARLIFE

COEFFICIENT OF FRICTION

Titanium (WHITE)

High quality, BRIGHT WHITE extrusion.

The name ***Titanium White®*** refers to the special metal because it has comparable unique properties, like high strength and optimum performance, generating low friction, absorbing heat and reducing energy consumption.

Thanks to the ***Titanium White®*** characteristics, the extruded profiles are made of an intense white UHMW-PE, resulting in a smoother surface and devoid of push marks, meaning in a minimized power consumption and possible goods defect. Is has also an improved UV and aging resistance and a high chemical resistance.

UP TO **50%**

IMPROVED RESISTANCE

COMPARISON WITH UHMW-PE

Molecular density: **9,200,000** g/mol.

Operating temperature: **-40 to + 80°C** (-40 to 176°F)

Linear expansion coefficient: **2 x 10-4°C-1** (1.1 x 10-4 °F-1)

FDA APPROVED

UHMW-PE

Standard profiles are all made with a first-rate **UHMW-PE** polyethylene, a thermoplastic polymer with a variable crystalline structure with a vast range of applications.

UHMW-PE is available in several colors and lengths. It's the perfect choice to reach your line performance against an attractive price.

FDA APPROVED

Green **Black** **Blue** **Grey**

Molecular density:
5,600,000 g/mol.

Operating temperature:
-40 to + 80°C (-40 to 176°F)

Linear expansion coefficient:
2 x 10-4°C-1 (1.1 x 10-4 °F-1)

AS Antistatic

Plastic packaging and PET bottles can generate high levels of static buildup.

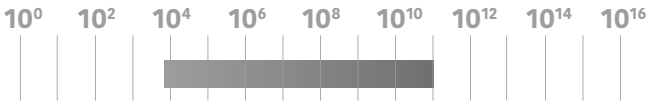

Static dissipative profiles are plastics designed to reduce static electricity in order to protect electrostatic-sensitive devices or contain flammable liquids or gases.

Molecular density:
5,600,000 g/mol.

Operating temperature:
-40 to + 80°C (-40 to 176°F)

Linear expansion coefficient:
2 x 10-4°C-1 (1.1 x 10-4 °F-1)

Surface resistivity (Ohm/sq)

METAL CONDUCTORS PLASTIC INSULATORS

HIGH QUALITY SIDE GUIDES

Made with ram extrusion technology and new patented process.

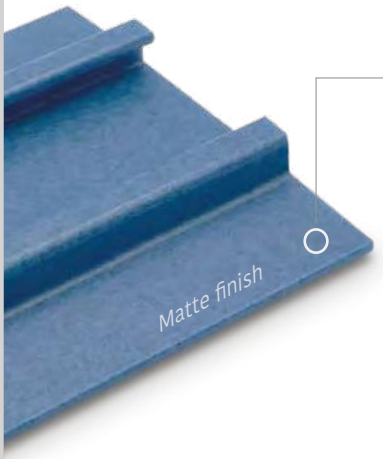

The Movex side guides, extruded with RAM extrusion technology, are the perfect choice to improve the conveyor performances. Thanks to a new patented and innovative production process, we have further enhanced our range of profiles, improving performance and reducing the dust creation.

These profiles are available with height from 50 to 170 mm, and with many different shapes and types (with clamping system or label saver), and can also be extruded with our unique materials ***BluLub®*** and ***Titanium White®***, providing unparalleled performance and reliability.

KEY BENEFITS

compared to traditional extrusion technique:

- Best efficiency • Increased wall thickness
- Superior flatness • Improved sliding properties
- Reduced product damage • Smoother shape
- Less dust/powder • Improved superficial texture
- High-level quality standards

RS SIDE GUIDE RAIL

Easy and modular replacement label saver system.

RS Side guide profile is a development which enable you to simplify your business! Thanks to the replaceable wear-strip in ***BluLub®***, ***RS Side guide profile*** can reduce total cost of ownership: in case of required maintenance, only ***BluLub®*** strips can be replaced, saving time at a lower cost.

Different profiles are available from stock and can be mounted in different ways to optimize the support of your product according to the specific needs.

RS Side guide rail profiles
are available in various executions.

Increased performance

BluLub® wearstrips contribute to a lower friction which results in less energy consumption.

Fast and easy maintenance

Thanks to its innovative design, the easy replaceable ***BluLub®*** wearstrips meets the needs to reduce maintenance time.

Interchangeable wearstrip

Every ***BluLub®*** wearstrip has the same fixing system, this makes all versions interchangeable. In case of required replacement, wearstrips can be ordered as coiled spare parts.

No gap between connection

BluLub® wearstrip allows you to connect two or more different base profiles with no gap, by simply slide it in.

The right choice for:

- Innovative equipment
- Total cost reduction
- Less energy consumption
- Improved product stability

Materials:

• Base profile: ***UHMW-PE*** (see details).
• Label saver: ***BluLub®*** polyethylene UHMW-PE with molecular density 9,200,000 g/mo. with reduced coefficient of friction and higher wear resistence and its complies with the code of Federal Regulations of FDA (see details).

Movex® PROFILE TEST

Technische universität CHEMNITZ.

TECHNISCHE UNIVERSITÄT
CHEMNITZ

The following graphics show the test results obtained with a cooperation with the Technical University of Chemnitz, which analysed the coefficient of friction and the wear values of the Movex profiles (BluLub, Ti-White and UHMPWPE) in combination with our main plastic chain materials (LF and PFX) and cans and PET bottles.

A dedicated setup shown in the following pictures have been studied, in order to represent the reality as much as possible (it must be considered that, being a test environment, many factors could not be considered, e.g. temperature, dirt, cycling operations).
In general, it can be seen that the friction values are below 0.15 in all tests for BluLub and Titanium White, i.e., the pairings consistently exhibit very good sliding behaviour. For UHMW-PE and HDPE the values show clearly different performances.
The LF chain produced the expected results with the drop in friction values from dry running to water lubrication to lubricant. It is noticeable that significantly lower friction values were measured with water and lubricant compared to PFX chain. With the PFX chain, the phenomenon also occurs that the friction values with water lubrication are noticeably higher than those with dry running.
For dry conditions, BluLub and PFX combination offers the best performances, even if the combination of Titanium White and LF is not that far away; the main differences between the two combinations is shown in the wear graphs.
Another clear difference (which is not analysed in this report, as was not the scope of it) is the carried product stability; in fact, the coefficient of frictions of PFX and LF are very different (more information on the Movex general catalog).
In water condition it is evident that LF in combination with Ti-White offers the best performance.
For the complete report, please ask to your sales representative.

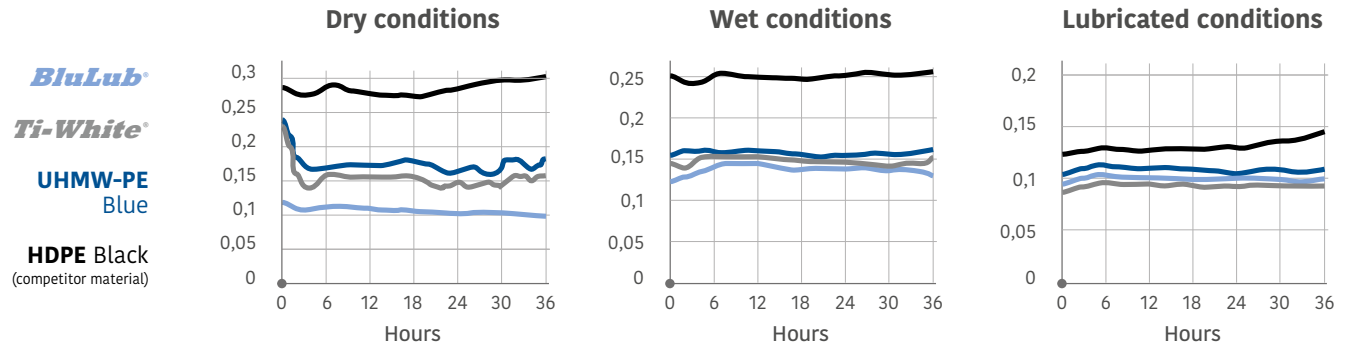

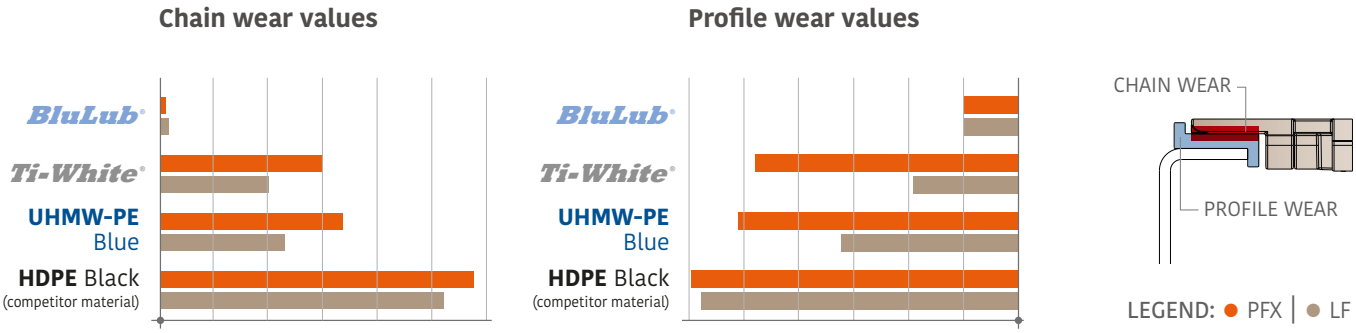

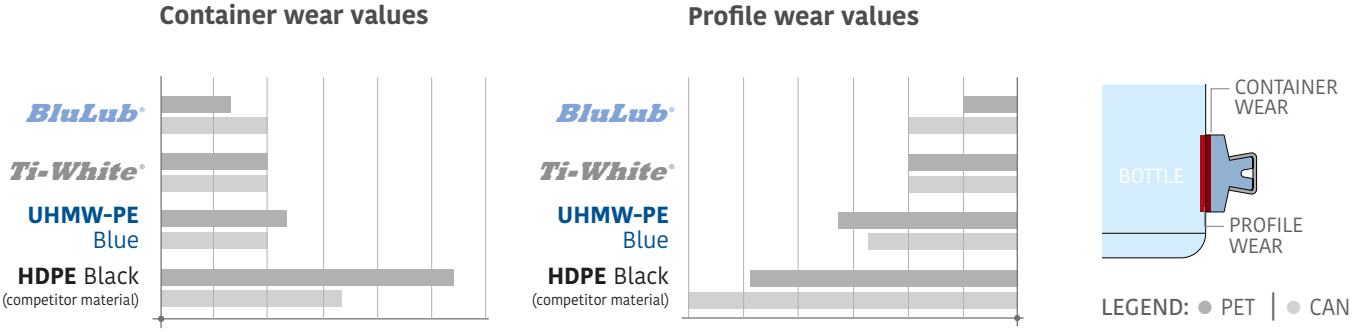

Friction values (averaged between 30 and 36 hours running time)

Conveyor test	Dry		Wet		Lubricated	
	PFX	LF	PFX	LF	PFX	LF
BluLub®	0,100	0,119	0,137	0,094	0,096	0,061

BluLub® STABILIZED *DO YOU KNOW WHAT IT IS?*

All Movex neck guides are now made with ***BluLub® STABILIZED***, a new compound based on our BluLub and developed specifically for this type of product and its application. Thanks to the addition of a special additive we have improved dimensional stability and reduced the thermal expansion.

Shoes and connecting elements

Example of application

* Standard 3 m (10 ft) or 6 m (20 ft) profiles are typically shipped by common carrier. Selected items can be coiled into cartons for more convenient shipping.

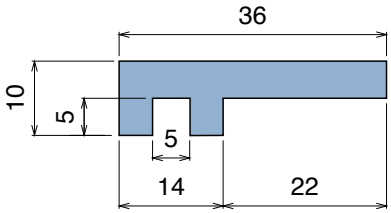

*Products stored in coils will have the tendency to retain a certain deformation when uncoiled, therefore consistency in the profile cross section over the full length of the coil cannot be guaranteed.

17902-60	Green	Stock item	60 m coils

Example of application

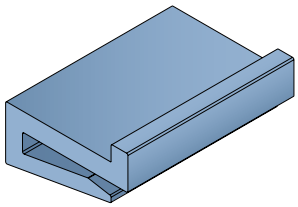

* Standard 3 m (10 ft) or 6 m (20 ft) profiles are typically shipped by common carrier. Selected items can be coiled into cartons for more convenient shipping.

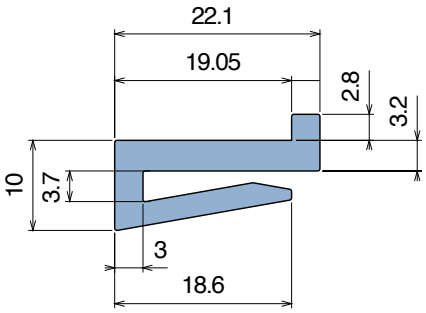

*Products stored in coils will have the tendency to retain a certain deformation when uncoiled, therefore consistency in the profile cross section over the full length of the coil cannot be guaranteed.

Example of application

* Standard 3 m (10 ft) or 6 m (20 ft) profiles are typically shipped by common carrier. Selected items can be coiled into cartons for more convenient shipping.

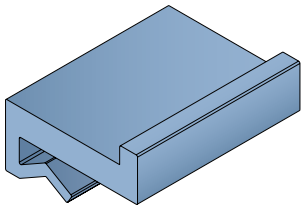

*Products stored in coils will have the tendency to retain a certain deformation when uncoiled, therefore consistency in the profile cross section over the full length of the coil cannot be guaranteed.

Example of application

Used with
Part 164/165
Page 433

Use as a reference
for the inner dimensions of the profile.

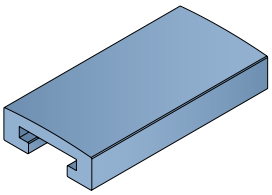

* Standard 3 m (10 ft) or 6 m (20 ft) profiles are typically shipped by common carrier. Selected items can be coiled into cartons for more convenient shipping.

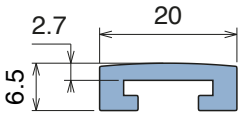

*Products stored in coils will have the tendency to retain a certain deformation when uncoiled, therefore consistency in the profile cross section over the full length of the coil cannot be guaranteed.

108405C	Blue	On request	3 m bars
108405	Blue	On request	6 m bars
108405-30	Blue	On request	30 m coils

Example of application

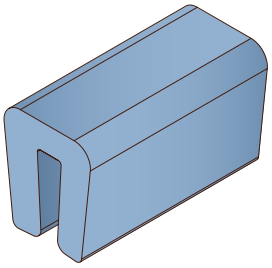

* Standard 3 m (10 ft) or 6 m (20 ft) profiles are typically shipped by common carrier. Selected items can be coiled into cartons for more convenient shipping.

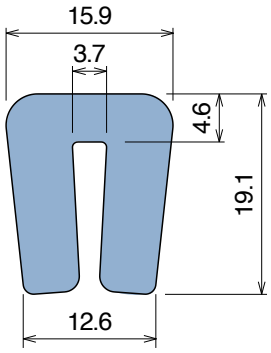

*Products stored in coils will have the tendency to retain a certain deformation when uncoiled, therefore consistency in the profile cross section over the full length of the coil cannot be guaranteed.

198-199

Macchina curvatrice / *Bending machine / Biegemaschine*

Delivery: Easy Standard

Electric Bending machine

Article-Nr. 19848

Dimension base: 665 x 740 mm
Height: 1400 mm
Approximate weight: 170 Kg
Shafts diameter: 30 mm
Rolls diameter: 137 mm
Geared motor: HP 1
Shafts speed: 9 RPM
Steel frame
Two forming rolls
Steel shafts in special steel

Manual Bending machine

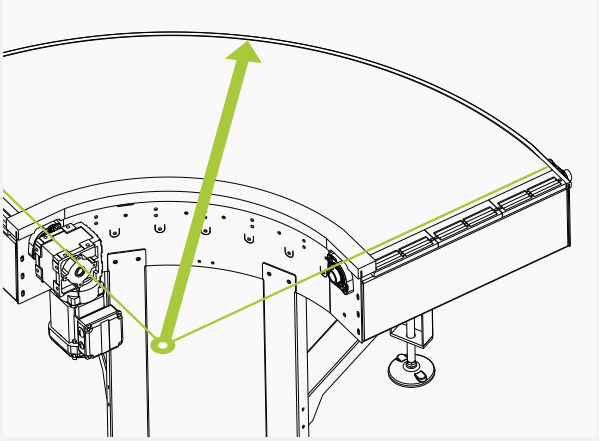

Article-Nr. 19999

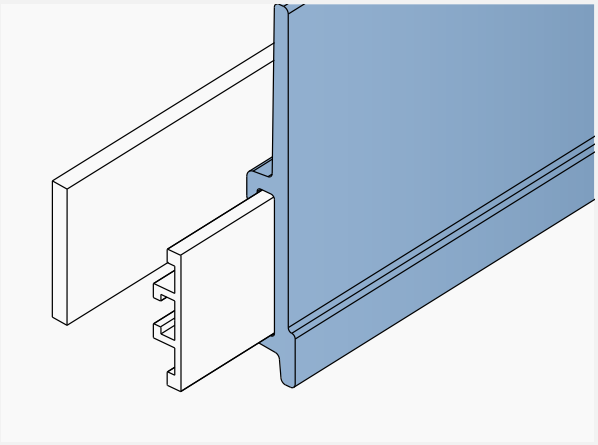

Dimension: 570 x 260 mm
Approximate weight: 19 Kg
Shafts diameter: 25 mm
Height: 180 mm
Steel frame

To achieve the correct curvature please follow below steps:

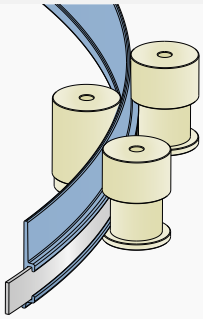

1 | Identify correct curve radius angle

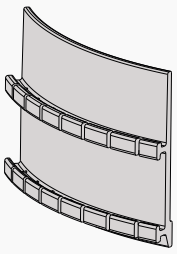

2 | Insert the plate into the profile

3 | Bend assembled profile

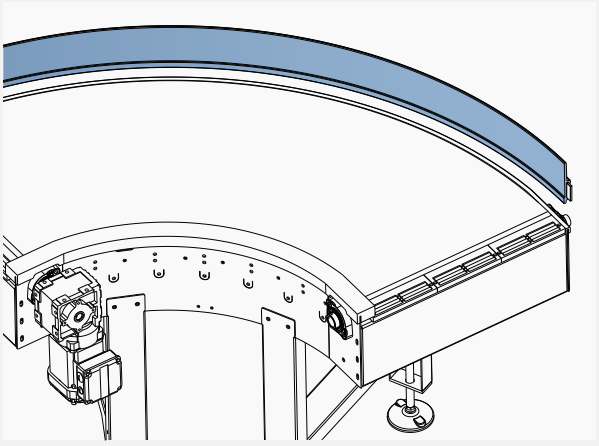

For the related rollers, please refer to our general catalogue or ask to sales representative.

Easy Bendable
For the grooved version, you don't need to bend the profile but you can mount it directly on the curved steel plate.

4 | Assemble the curved profile on the line

*For narrower profiles, bending operation can be dare directly on the line, by hand.

SS ProRun

*The **Pro** choice for uncompromising performance.*

Manufactured with premium materials to ensure maximum reliability and durability, the new **SS ProRun** bearing insert is the ideal solution for those who need performance, even in the most demanding environments and under the most critical conditions.

- **AISI 440 rings:** Absolute guarantee of precision and robustness.
- **AISI 440 bearings and balls:** Maximum corrosion resistance and longevity.
- **FDA blue NBR seals:** Perfect sealing, protection from contaminants.
- **FDA-certified grease:** Superior lubrication for excellent and long-lasting performance.

Optimize your operations and choose quality that lasts; choose SS ProRun.
Browse the catalog and discover the available versions.

UCFL *Grub screw*

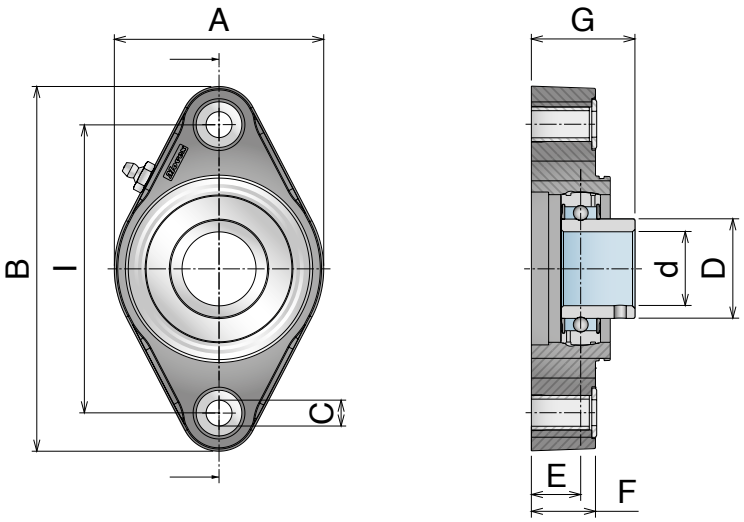

Standard bearings - reinforced version

Main features:

- Housing in reinforced polyamide
- Chrome steel or stainless steel ball bearing (pre-lubricated)
- Nickel-plated brass mounting hole spacers
- Nickel plated steel or SS grease nipple with self-forming thread M6
- Stainless steel washers

FIXING METHOD

SS ProRun

*The **Pro** choice for uncompromising performance.*

Manufactured with premium materials to ensure maximum reliability and durability, the new **SS ProRun** bearing insert is the ideal solution for those who need performance, even in the most demanding environments and under the most critical conditions.

- **AISI 440 rings:** Absolute guarantee of precision and robustness.
- **AISI 440 bearings and balls:** Maximum corrosion resistance and longevity.
- **FDA blue NBR seals:** Perfect sealing, protection from contaminants.
- **FDA-certified grease:** Superior lubrication for excellent and long-lasting performance.

Optimize your operations and choose quality that lasts; choose SS ProRun.
Browse the catalog and discover the available versions.

SS ProRun

*The **Pro** choice for uncompromising performance.*

Manufactured with premium materials to ensure maximum reliability and durability, the new **SS ProRun** bearing insert is the ideal solution for those who need performance, even in the most demanding environments and under the most critical conditions.

- **AISI 440 rings:** Absolute guarantee of precision and robustness.
- **AISI 440 bearings and balls:** Maximum corrosion resistance and longevity.
- **FDA blue NBR seals:** Perfect sealing, protection from contaminants.
- **FDA-certified grease:** Superior lubrication for excellent and long-lasting performance.

Optimize your operations and choose quality that lasts; choose SS ProRun.
Browse the catalog and discover the available versions.

SS ProRun

*The **Pro** choice for uncompromising performance.*

Manufactured with premium materials to ensure maximum reliability and durability, the new **SS ProRun** bearing insert is the ideal solution for those who need performance, even in the most demanding environments and under the most critical conditions.

- **AISI 440 rings:** Absolute guarantee of precision and robustness.
- **AISI 440 bearings and balls:** Maximum corrosion resistance and longevity.
- **FDA blue NBR seals:** Perfect sealing, protection from contaminants.
- **FDA-certified grease:** Superior lubrication for excellent and long-lasting performance.

Optimize your operations and choose quality that lasts; choose SS ProRun.
Browse the catalog and discover the available versions.

CL *Grub screw*

Watertight bearings - solid version

Main features:

- Housing in reinforced polypropylene & cover in SS
- Chrome steel or stainless steel ball bearing (pre-lubricated)
- Nickel-plated brass mounting hole spacers
- Nickel plated steel or SS grease nipple with self-forming thread M6
- Polypropylene close cap with O-ring seal
- NBR bottom seal

FL *Grub screw*

Watertight bearings - solid version

Main features:

- Housing made of additive-enhanced PBT for improved thermal expansion resistance and working temperature
- Stainless steel ball bearing (pre-lubricated)
- Stainless steel mounting hole spacers
- Stainless steel grease nipple
- Polypropylene open cap with O-ring seal & NBR top seal
- Washer for grease nipple in PE
- NBR bottom seal

Movex

UCT *Grub screw*

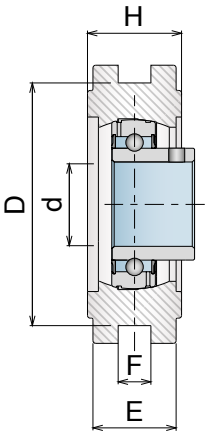

Standard bearings - solid version

Main features:

- Housing made of additive-enhanced PBT for improved thermal expansion resistance and working temperature
- Stainless steel ball bearing (pre-lubricated)
- Stainless steel mounting hole spacers
- Stainless steel grease nipple
- Washer for grease nipple in PE

Basic Series

Delivery: Easy Standard

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel

Other versions available:

- Double floor fixation
- Base and spindle made in polyamide and zinc plated insert.

The **BASIC series**, with plastic baseplate and fully threaded spindle is the standard choice for the industrial environments.

The spindle can be made with flat or hexagonal key wrench and is available in two different materials, zinc plated steel or stainless steel.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 500 N.

Delivery: Easy Standard

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel

Other versions available:

- Anti-slip NBR rubber pad
- Double floor fixation
- WIth PA ball

The **ARTICULATED series**, with plastic baseplate and fully threaded spindle is the standard choice for the industrial environments.

The spindle is made with hexagonal key wrench and available in two different materials, zinc plated steel or stainless steel and the baseplate is available with or without rubber pad.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 500 N.

Muscle Series

Delivery: Easy Standard

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel
- Washer in austenitic stainless steel
- Double floor fixation points

Other versions available:

- Anti-slip NBR rubber pad
- Double floor fixation

The **MUSCLE series**, with plastic baseplate, fully threaded spindle and stainless steel washer is the standard choice for the industrial environments.

The spindle can be made with flat or hexagonal key wrench and is available in two different materials, zinc plated steel or stainless steel and the baseplate is available with or without rubber pad.

The spindle is fixed by using a circlip or with a self-locking nut.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 1.000 N

P400R Series

RANGE EXTENSION

Delivery: Easy Standard

Main features:

- Molded baseplate in polyamide
- Spindle in austenitic stainless steel or zinc plated steel
- Washer in austenitic stainless steel

Versions available:

- Anti-slip NBR rubber pad
- Double floor fixation

The **P400R series**, with plastic baseplate, fully threaded spindle and stainless steel washer is the best choice for industrial environments where a medium-high level of hygiene is required.

The compact baseplate and the smooth edges guarantee an excellent cleanability, even in critical conditions and the stainless steel washer ensures complete closure between the spindle and the baseplate.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 500 N.

STEEL Series

Delivery: Easy Standard

Main features:

- Stamped baseplate in austenitic stainless steel or zinc plated steel
- Spindle in austenitic stainless steel or zinc plated steel

The **STEEL series**, with stamped baseplate and fully threaded spindle is the standard choice for the industrial environments, where a low level of hygiene and low load are required.

Ideal for heavy and dirthy production environments, the STEEL series can be provided without fixing holes, with 2 fixing holes or with 4 fixing holes.

The spindle is made with hexagonal key wrench and is available in two different materials, zinc plated steel or stainless steel.

Maximum compressive strength (static load) 10.000 N, maximum tensile strength (static load) 4.000 N.

Movex®

S400 Series

STAINLESS STEEL LEVELERS
WITH FULLY THREADED SPINDLE

RANGE EXTENSION

Delivery: Easy Standard

S400

Main features:

- Overmolded baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Washer in austenitic stainless steel
- Vulcanized anti-slip NBR rubber

Versions available:

- Single floor fixation

S400 SPLIT

Main features:

- Overmolded baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Separate spindle and baseplate
- Vulcanized anti-slip NBR rubber

S400 HEAVY

Main features:

- Full machined baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Washer in austenitic stainless steel

Versions available:

- Vulcanized anti-slip NBR rubber
- Double floor fixation

S400 HEAVY-SPLIT

Main features:

- Full machined baseplate in austenitic stainless steel
- Spindle in austenitic stainless steel
- Separate spindle and baseplate

Versions available:

- Vulcanized anti-slip NBR rubber

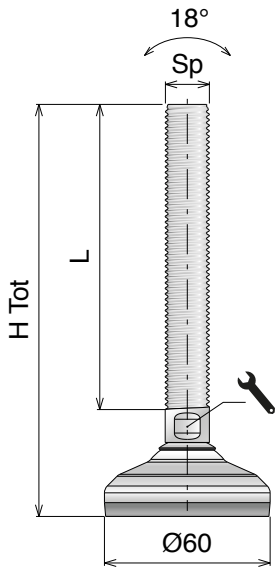

The **S400 series**, with overmolded base plate in austenitic stainless steel, fully threaded spindle and stainless steel washer is the best choice for industrial environments where a high level of hygiene is required.

The stainless steel baseplate and its particular shape guarantees an excellent cleanability, even in critical conditions; the stainless steel washer ensures complete closure between the spindle and the baseplate and the NBR rubber guarantees anti-slip properties and hermetic closure between the leveller and the floor.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 4.000 N (S400); 8.000 N (S400 HEAVY); NOT AVAILABLE (SPLIT and HEAVY-SPLIT).

On request vulcanized rubber can be provided white or blue and spindle can be made in AISI 316.

Materiale / ***Material*** / ***Materialien:***
Base, stelo e rondella: Acciaio inox
Base plate, spindle and washer: Stainless steel
Fussplatte, Spindel und Scheibe: Edelstahl

S400B Series HYGIENIC STAINLESS STEEL LEVELERS

RANGE EXTENSION

Delivery: Easy Standard

S400B

Main features:
- Overmolded baseplate in AISI 304
- Spindle and cover in AISI 304
- Washer in AISI 304
- Vulcanized anti-slip NBR rubber

Versions available:
- with single floor fixation

S400B SPLIT

Main features:
- Overmolded baseplate in AISI 304
- Spindle and cover in AISI 304
- Separate spindle and baseplate
- Vulcanized anti-slip NBR rubber

S400B HEAVY

Main features:
- Full machined baseplate in AISI 304
- Spindle and cover in AISI 304
- Washer in AISI 304 stainless steel

Versions available:
- Vulcanized anti-slip NBR rubber
- Double floor fixation

S400B HEAVY-SPLIT

Main features:
- Full machined baseplate in AISI 304
- Spindle and cover in AISI 304
- Separate spindle and baseplate

Versions available:
- Vulcanized anti-slip NBR rubber

The **S400B series**, with overmolded baseplate in AISI 304 stainless steel, threaded spindle with complete closure cover and stainless steel washer is the best choice for industrial environments where a high level of hygiene is required, like food, chemical and pharmaceutical industries.

The stainless steel baseplate and its particular shape guarantee an excellent cleanability, especially in critical conditions; the stainless steel cover avoids exposure of the thread part to external agents; the stainless steel washer ensures complete closure between the spindle and the baseplate and the NBR rubber guarantees anti-slip proprieties and hermetic closure between the leveler and the floor.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 4.000 N (S400); 8.000 N (S400 HEAVY); NOT AVAILABLE (SLIT and HEAVY-DUTY).

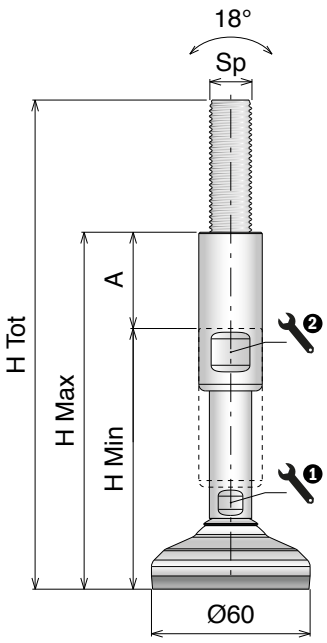

Accessori / Accessories / Zubehör Find out more details on page 763/764

Movex

C500 Series

HYGIENIC AND CERTIFIED
STAINLESS STEEL LEVELERS

The **C500 series** is the best choice for industrial environments with critical hygienic level, like dairy, food, chemical and pharmaceutical industries, subjected to daily washing cycles.

It offers a complete protection against bacterial proliferation and guarantees reduced washing cycle time as well as self-draining surfaces able to drain external elements easier than traditional systems.

The new **C500 series** with hygienic stainless steel follows actual regulations and is approved by **3A** and **EHEDG** normative. Base, spindle and cover are produced exclusively in AISI 304, with surface finishing lower than 0,8 µm, silicon blue seals are **FDA** approved and easily detectable by industrial scanner.

HYGIENIC DESIGN
Completely sanitized and certified

***SAVING** (Energy, water, detergents)*
Fewer resources for sanitation

SUPERIOR DURABILITY
Thanks to the threaded part's cover

CLEANLINESS
Reduced washing cycle

AVAILABLE RANGE

The **C500 series** is available as following versions:

C500 Series
For standard applications, hygienic and certified.

C500 Series SPLIT
For application with higher floor slope or where separate base and spindle are required.

C500 Series HEAVY
For high load applications.

C500 Series HEAVY-SPLIT
For high load applications where the separate base and spindle are required.

Every above version offers excellent hygienic performances.

CERTIFICATIONS

The **C500 series** has 3A and EHEDG certifications, provided based on the selected type.

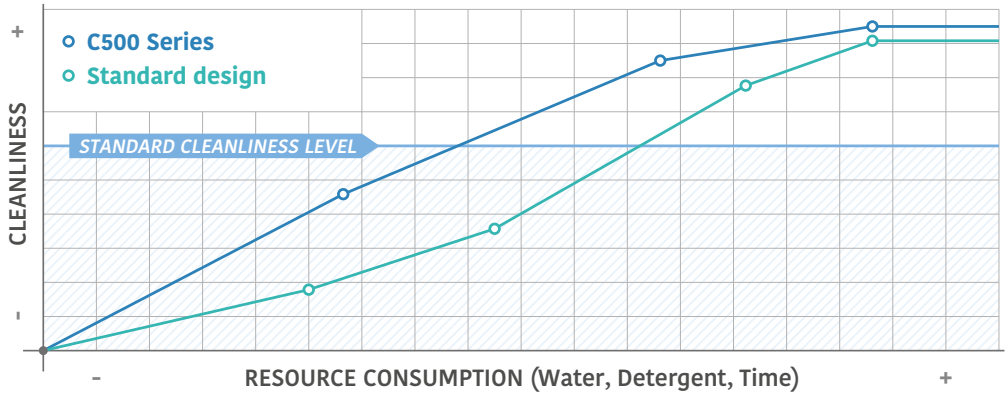

These certifications are released by no profit associations that protect consumers, guaranteeing products made according to the internal standards. This applies to all processes and components in contact directly or indirectly with every single food. Movex is committed to offer a high quality product in according to the most recent normative.

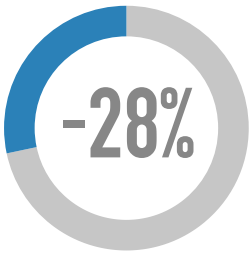

- Non-profit European consortium
- Regulations for food manufacturers, machine food manufactures and food raw material suppliers
- Research institutes and universities
- Government health agencies
- Approximately 45 guidelines

- Non-profit American association
- Regulations for food manufacturers, machine food manufactures and food raw material suppliers
- Public and governmental health agencies
- Over 70 guidelines

WHY CHOOSE A CERTIFIED PRODUCT?

Calculated saving

The stainless steel self-draining surfaces help the entire washing process, reducing time and resources consumption.

UV ray analysis

The real difference between a conventional leveler and the hygienic and certified **C500 series** is invisible with human eyes.

If we compare two levelers that have been subjected to the same washing process, they will both look clean and sanitized; but analyzed with UV ray, we will see that the conventional solution is still contaminated by bacteria (see picture).

C500 Series

DECLARATION OF CONFORMITY

C500, C500-HEAVY, C500-SPLIT, C500-HEAVY-SPLIT series are certified 3A and EHEDG, following product details.

FEATURES

Base, spindle and cover material:

- Stainless steel AISI 304 (1.4301) – available also in AISI 316 (1.4401) on request

Anti-slip rubber:

- NBR rubber, color black
- Hardness: 70-75 Shore-A
- Working temperature: -30°C÷110°C
- Compliant to REACH (CE 1907-2006)
- Compliant to ROHS&ROHS 2 (2002/95/EC)

Seals:

- Silicone rubber, color blue
- Hardness: 60 Shore-A
- Working temperature: -60°C÷200°C
- Compliant to FDA normative

Ref. Norms.

The **C500 series** and all its versions (**HEAVY, SPLIT** and **HEAVY-SPLIT**) are the ideal choice for all those environments where hygienic level is constantly monitored (dairy, food, chemical and pharmaceutical industries) subjected to daily washing cycles.

Self-draining surfaces with roughness lower than 0,8 µm and the 3 seals (blue silicone detectable with food scanner) placed respectively inside the cover and between the spindle and the baseplate guarantee a hermetic closure, avoiding any external parts infiltration.

Following 3A normative, levelers are properly installed when they provide a minimum clearance between the lowest part of the equipment and the floor of not less than 4.0 in. (102 mm) when the equipment base outlines an area in which no point is more than 12.5 in. (318 mm) from the nearest edge of the base, or a clearance of at least 6 in. (152 mm) when any point is more than 12.5 in. (318 mm) from the nearest edge.

Following EHEDG normative, recommended distance between floor and machined is at least 300 mm. Levelers with fixation need to be installed always with Movex certified nuts, on the contrary the company will not guarantee certifications requirements (follow installation manual – floor fixation, provided with every delivery).

Movex supplies all certified levelers with seals (unlosable); nevertheless, the end user should always check correct seals position before proceeding with the installation (follow installation manual, provided with every delivery).

C500 levelers have great resistance to the most common industrial detergents, following material specifications, compatible with producer specifications.

For a correct execution, please always follow provided manual (maintenance and cleaning manual, included in every delivery).

C500 Series

HYGIENIC AND CERTIFIED STAINLESS STEEL LEVELERS

Delivery: Easy Standard

C500

Main features:

- Overmolded self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber

Other versions available:

- Single floor fixation

3-A 88-01

C500 SPLIT

Main features:

- Overmolded self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber
- Separate spindle and baseplate

3-A 88-01

C500 HEAVY

Main features:

- Full machined self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber

Other versions available:

- Double floor fixation

3-A 88-01 EHEDG

C500 HEAVY-SPLIT

Main features:

- Full machined self-draining baseplate in AISI 304
- Spindle and cover in AISI 304
- Blue seals for hermetic closure
- Vulcanized anti-slip NBR rubber
- Separate spindle and baseplate

3-A 88-01

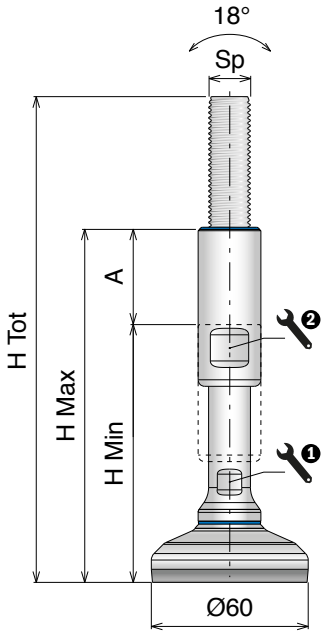

The **C500 series**, with baseplate in AISI 304 stainless steel, threaded spindle with cover and hermetic seals is the best choice for industrial environments with critical hygienic level, like dairy, food, chemical and pharmaceutical industries, subjected to daily washing cycles.

The stainless steel baseplate and its particular shape guarantee an excellent cleanability, especially in critical conditions; the stainless steel cover offers 100% thread protection and avoids its exposure to external agents; the three seals (blue silicone detectable with food scanner) placed respectively inside the cover and between the spindle and the baseplate guarantee a hermetic closure, avoiding any external parts infiltration and the NBR rubber guarantees anti-slip proprieties and hermetic closure between the leveler and the floor.

Maximum compressive strength (static load) as in the table, maximum tensile strength (static load) 4.000 N (S400); 8.000 N (S400 HEAVY); NOT AVAILABLE (SPLIT and HEAVY-SPLIT).

The **C500 series** can also be combined with hygienic bolts, nuts and covers for perfect sanitation.

Lubrication	Product Material					
	Paper & carton	Metal (steel)	Aluminium	Plastics & PET	Glass (returnable)	Glass (new)
Dry	0,38	0,48	0,33	0,29	0,45	0,33
Water	n.a.	0,33	0,29	0,24	0,29	0,29
W&s & Dry lube	n.a.	0,19	0,14	0,14	0,20	0,14
Oil	n.a.	0,19	n.a.	n.a.	n.a.	n.a.

Friction Factors Between Material and Product

Lubrication	Wearstrip Material		
	Stainless steel	UHMW-PE & PA	BluLub®
Dry	n.a.	0,33	0,30
Water	0,38	0,26	0,23
W&s & Dry lube	0,19	0,17	0,14
Oil	0,19	0,17	0,14

Note

Material properties and performance of final product are subject to variation according to operating conditions, e.g. environmental conditions, chemicals, cleanliness.

SSM

Description

Specially treated Ferritic SS (1.4589)
with optimized surface finish for superior sliding properties. For High-Speed and more critical applications.

Materials

General information

Material	Chemical abbreviation	Allowable application temperatures						FDA Approval
		Fahrenheit			Celsius			
		Min	Max		Min	Max		
			Dry	Wet		Dry	Wet	
Max Speed Stainless Steel	1.4589	-22	750	265	-30	400	130	-

Friction Factors Between Material and Product

Lubrication	Product Material					
	Paper & carton	Metal (steel)	Aluminium	Plastics & PET	Glass (returnable)	Glass (new)
Dry	0,34	0,43	0,30	0,26	0,40	0,30
Water	n.a.	0,30	0,26	0,21	0,26	0,26
W&s & Dry lube	n.a.	0,17	0,13	0,13	0,18	0,13
Oil	n.a.	0,17	n.a.	n.a.	n.a.	n.a.

Friction Factors Between Material and Product

Lubrication	Wearstrip Material		
	Stainless steel	UHMW-PE & PA	BluLub®
Dry	n.a.	0,32	0,29
Water	0,36	0,24	0,22
W&s & Dry lube	0,18	0,16	0,14
Oil	0,18	0,16	0,14

Note

Material properties and performance of final product are subject to variation according to operating conditions, e.g. environmental conditions, chemicals, cleanliness.

SSA

Materials

Description

Austenitic Stainless Steel with high resistance to corrosion and acid (AISI 304)

for improved working-load and less friction.

General information

Material	Chemical abbreviation	Allowable application temperatures						FDA Approval
		Fahrenheit			Celsius			
		Min	Max		Min	Max		
			Dry	Wet		Dry	Wet	
Austenitic Stainless Steel	AISI 304	-22	750	265	-30	400	130	-

Friction Factors Between Material and Product

Lubrication	Product Material					
	Paper & carton	Metal (steel)	Aluminium	Plastics & PET	Glass (returnable)	Glass (new)
Dry	0,43	0,38	0,34	0,30	0,33	0,33
Water	n.a.	0,30	0,27	0,21	0,29	0,29
W&s & Dry lube	n.a.	0,15	0,14	0,14	0,15	0,15
Oil	n.a.	n.a.	n.a.	n.a.	n.a.	n.a.

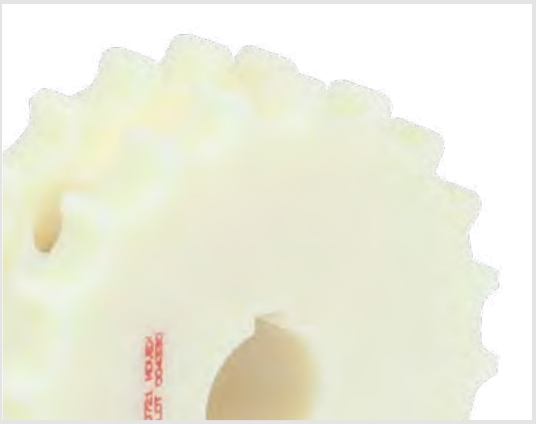

Friction Factors Between Material and Product

Lubrication	Wearstrip Material		
	Stainless steel	UHMW-PE & PA	BluLub®
Dry	0,40	0,30	0,30
Water	0,35	0,22	0,22
W&s & Dry lube	0,15	0,15	0,15
Oil	0,15	0,10	0,10

Note

Material properties and performance of final product are subject to variation according to operating conditions, e.g. environmental conditions, chemicals, cleanliness.

PA

Description

PA Polyamide composite

The high crystallinity of this material gives it excellent mechanical properties such as high abrasion, high wear resistance as well as good hardness and stiffness.

Primary Component: *Polyamide (PA)*

Screws: *Stainless steel*
Nuts: *Zinc plated steel*

Materials

General information

Material	Chemical abbreviation	Allowable application temperatures						FDA Approval
		Fahrenheit			Celsius			
		Min	Max		Min	Max		
			Dry	Wet		Dry	Wet	
Polyamide	PA	-40	221	N.R.	-40	105	N.R.	YES

Note: Material properties and performance of final product are subject to variation according to operating conditions, e.g. environmental conditions, chemicals, cleanliness.

Reinforced PA

Description

PA Polyamide reinforced

High quality polyamide specifically developed for injection molding, glass fiber reinforced.

Primary Component: *Polyamide (PA)*

Screws: *Stainless steel*
Nuts: *Nickel plated brass*

Materials

General information

Material	Chemical abbreviation	Allowable application temperatures						FDA Approval
		Fahrenheit			Celsius			
		Min	Max		Min	Max		
			Dry	Wet		Dry	Wet	
Polyamide Reinforced	PA	-4	248	248	-20	120	120	-

Note: Material properties and performance of final product are subject to variation according to operating conditions, e.g. environmental conditions, chemicals, cleanliness.
